GERMAN MAIN BATTLE TANK

LEOPARD 1 A5

Leopard 1 was originally conceived to face the threat of Soviet T-54, T-55 and T-62. Leopard 1A5 was the 'ultimate' Leopard 1.

During the Cold War, there was a constant demand to keep up with the Soviet threat of the later and more powerfully-armed T-64 and T-72. The German army modified Leopard 1 throughout its life and the final update programme incorporated the fire-control system and thermal imaging site developed for Leopard 2.

1,225 tanks from the Leopard 1A1A1 family were modified between 1986 and 1992 with EMES 18 sites. This was a revolution in the world of fire-control systems, the first to use a laser rangefinder allowing all-weather, day or night, vision.

1A5 went on to be used by Brazil, Canada, Greece, Italy, Norwayand Turkey. In March 2014, the Canadian version of the 1A5, the Leopard C2, fired its last live shots before being decommissioned after seeing successful active service in Afghanistan as the Leopard C2 MEXAS. *<Lepard 1 Trilogy>*

READ BEFORE ASSEMBLY

CAUTION

- Read carefully and fully understand the instructions before commencing assembly. A supervising adult should also read the instructions if a child assembles the model.
- When assembling this kit,tools including knives used.Extra care should be taken to avoid personal injury.
- Keep out of reach of small children.Children must not be allowed to suck any part, or pull vinyl bag over their heads.

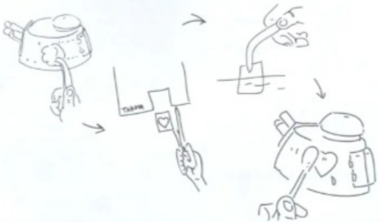
Optional
Remove
Painting
Fill Holes
Do Not Cement
Instant Glue for Metal
Apply Decal

PAINTS REQUIRED

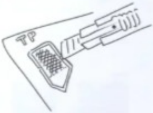
XF-1 Flat Black
XF-57 Buff
XF-58 Olive Green
XF-60 Dark Yellow
XF-67 NATO Green
XF-68 NATO Brown
XF-68 NATO Black
X-10 Gun Metal
X-11 Chrome Sliver

APPLYING DECALS

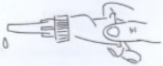
1.Clean the model surface with a wet cloth.
2.Cut out each decal design from sheet,and dip it in tepid water for 15~20 sec.
3.Hold the backing sheet edge and slide decal onto the model.
4.Move decal into position by wetting decal with finger.
5.Press decal gently down with a soft cloth until excess water and air bubbles are gone.



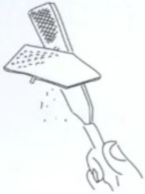
REMOVING PE



Be careful not to hurt when removing PE parts.



Secure using instant glue (not included).



Finish using file.

CANADIAN MAIN BATTLE TANK

LEOPARD C2

2014/2004

In 1977 the Leopard C1 main battle tank was purchased for the Canadian Army. The Leopard C1 served in Canada, Germany, Bosnia, and Kosovo between 1978 and 2000. As the Leopard C1 aged a requirement to enhance the capabilities of the Leopard led to an improvement project that combined the hulls of the existing Leopard C1s with upgraded turrets of ex-German Leopard 1A5s. The result was the Leopard C2 which entered service in 2000 and replaced the Leopard C1. The Leopard C2 formed the backbone of Canada's armoured force for seven years until the introduction of Canadian Leopard 2s. Leopard C2s fitted with MEXAS fought in Afghanistan between December 2006 and July 2011. The Leopard C2 will be retired from the Canadian Army beginning in 2014 thus ending a 37 year legacy of the Leopard 1 main battle tank in the Canadian Army.[Jason Bobrowich 2014]
