CMR 5097
scale 1/72

Information on the undercarriage colours

The airframe interior, wheel wells and inside of the undercarriage door covers were usually Grey-Green (on camouflaged aircraft) or Aluminium while the undercarriage legs and wheels disks were bare metal or sprayed Aluminium. The inside of the radiator intakes was either dull metal or Medium Sea Grey. The exhausts stubs were Golden Bronze. The rocket projectiles were painted in Dark Green.
