In March 18th, 2019, Egypt bought 24 Su-35 from Russia. The first five were delivered in February, 2021.

At the moment of the release of this project, no photos of the Su-35S with Egypt marks have been made public, this scheme was made based in how other Egyptian's Russian combat aircrafts, like the MiG-29 and MiG-35, are decorated.

After Eritrea lost a couple of MiG-29 during the Eritrean-Ethiopian War (May 6th, 1998 - June 18, 2000), Eritrea bought four Su-27SK and two Su-27UB from Russia through Ukraine.
Due little information about them has been made public, not much info can be found about them, but some sources say they are still operational.
