

# DRAW Decal Set 44s-C130-13

JASDF Original Colors C-130Hs

144 SCALE

Recommended Kit:  
1:144 Minicraft C-130

75-1075 flew in support of United Nations operations. Most of the vertical stabilizer was painted white, with black UN lettering added

Pegasus logo replaced earlier red and blue 1st Tactical Airlift Group logo

**PLEASE READ THESE INSTRUCTIONS, as these decals may apply a bit differently than you may be used to using.**

**Next Generation** DIGITAL Silk decals are extremely durable and do not easily scratch, and are printed on a continuous, clear film. Each design will need to be cut out individually. **Next Generation** DIGITAL Silk decals do not generally need to be clear coated prior to use. Use care when applying as the decal film is **exceptionally** thin. **Next Generation** DIGITAL Silk decals are tough, durable and exceptionally *flexible*. **DO NOT** float the decal off of the backing paper, as it will curl up and likely become unusable. Rather, soak the decal in warm water for about 5 seconds then remove it and allow it to sit for 30 seconds before trying to slide it off of the backing paper. "Normal" decal setting solutions can be used with these decals but will have little effect. For most applications, NO decal solvent will be needed. If you feel the need, we recommend using Microscale's Micro Set (a wetting agent) and Micro Sol (a SOLvent), but note the decal solvents only effect the clear film and have **LITTLE** effect on the inks. Brush the Micro Set directly on your model before sliding the decal into position. Only slide a small portion of the decal off of the backing paper, place the decal into position then pull out the backing paper allowing the decal to land in place. After you adjust the decal into position and soak up the excess liquid, apply a thin coat of Micro Sol (the **solvent**) to soften the clear carrier. It is important to get the Micro Sol **under** the decal, as the solvent has little effect on the ink, but it will dissolve the clear carrier which allows the decal to dig into the paint. After this coat dries and you are certain the decal is in its final position, apply a second heavier coat of Micro Sol. Note repeated applications of decal solvent will only wash away the glue. After the decals are **completely** dry, clear coating your model after applying these (or any) decals is a **must!** I repeat this is a **must**. The clear coat will seal your decal and prevent it from becoming damaged. Airbrush lacquers only in very light, misting coats. Another method to clear coat the decal is to use Future acrylic floor polish. Good luck and thank you for using **Next Generation** DIGITAL Silk decals!

# DRAW Decal Set 44s-C130-13

JASDF Original Colors C-130Hs

"Civil Decals for the Civilized"

The Japan Air Self-Defense Force took delivery of a fleet of 16 C-130H transports, with the first aircraft arriving in 1983. The aircraft, operated by the 401st Hikotai, were delivered in a camouflage scheme very similar to the U.S. Air Force's European One scheme, consisting of FS36118, FS34092 and FS34102.

## JASDF Original Colors C-130Hs

Aircraft lower fuselage and wing/stab undersides are FS36118. Upper surface camouflage colors are FS34092, FS34102 and FS36118. Demarcation of colors is illustrated here. Radome and engine nacelles are FS34092. Propeller hubs are black, as are the individual blade roots and tips. Markings are applied as illustrated. Aircraft wore JASDF 50th and 60th Anniversary stickers in 2004 and 2014 respectively. Check photo references for specific details of the aircraft you are modeling.
