1. Use the Ruler below to mark up where the stripes have to be positioned on the tank.
2. Mark as shown on the top view drawing.
3. Be sure to make sure it is centred to the middle of the tank.
4. Wet tank down with soapy water to help manoeuvre the decal in to the right place.
5. Place the above decal in the right place and allow it to rap itself around the tank. It should join up at the bottom of the tank in the middle. Some manipulation may be required.
