

PH 72.71

This metal plate will allow you to assemble easily a crew access ladder which you can use for any kit of Mirage III, V,F1 (1/72) Fold up the sides to 90° with regard to the rungs then fold back the upper plate A toward the interior of the ladder in order it will be perpendicular to the last rung. Fold up at last the part B in order it join the two uprights of your ladder.

For finishing, paint in yellow or in red

Crew access ladder MIRAGE III,V,F1

We advise you, for folding up the metal without any problem to lean you on the edge of a plastic plate and to use a pliers for all the manipulations you will have to do, the pieces being rather fragile when they are cutted off from their frame. For assembling, it is necessary to use a cyanoacrylate glue.
