ALONSO
2022

The KAI T-50 Golden Eagle is a family of South Korean supersonic advanced jet trainers and light combat aircraft, developed by Korea Aerospace Industries (KAI) with Lockheed Martin. The T-50 is South Korea's first indigenous supersonic aircraft and one of the world's few supersonic trainers. Development began in the late 1990s, and its maiden flight occurred in 2002. The aircraft entered active service with the Republic of Korea Air Force (ROKAF) in 2005.

The T-50TH is a LIFT aircraft designed to replace the Thai Air Force's aging L-39 Albatross trainers. The first T-50TH No.1 aircraft made its first flight on August 10, 2017, and the first two will be delivered to the Royal Thai Air Force in January 2018. Deliveries began in January 2018. From 2018 to 2020, a total of 12 T-50THs were delivered from KAI to the Thai Air Force. After that, two additional orders were placed in 2021. The Royal Thai Air Force plans to finally be fully organized into 16 T-50THs.

KAI T-50 Golden Eagle은 한국항공우주산업(KAI)이 록히드마틴과 함께 개발한 한국의 초음속 첨단 제트 훈련기 및 경전투기입니다. T-50은 최초의 국산 초음속 항공기이자 세계에서 몇 안 되는 초음속 훈련기 중 하나입니다. 1990년대 후반에 개발이 시작되어 2002년에 시제기의 첫 비행이 이루어져 첫 양산형인 T-50이 2005년 대한민국 공군에서 운용이 시작되었습니다.

T-50TH는 태국공군의 노후화한 L-39 알바트로스 훈련기를 대체하기 위해 제작된 LIFT 비행기입니다. 최초의 T-50TH 1호기가 2017년 8월 10일 최초비행을 했고 2018년 1월 태국 공군에 최초의 두 대가 전달됩니다. 2018년부터 2020년까지 총 12대의 T-50TH가 KAI에서 태국공군에 공급되었습니다. 이후 2021년에 2대의 추가주문이 발주 되었습니다. 태국공군은 최종적으로 T-50TH 16대로 완전 편제할 계획입니다.

Contains one unassembled model kit only.

No Paint and Cement in box.
Kit suitable for Age to Adult.

조립되지 않은 키트가 들어있습니다.
접착제와 도료는 들어있지 않습니다.
15세 이상 판매용
