

These decals provide Squadron markings, codes and serials. Stencil Data, Warnings, National Insignia etc. for four Tornado GR 1s (2 UK based, 2 RAF Germany based) and one Tornado F2/3 will be found on Xtradecal X006-72.

It should be noted that the aircraft based in Germany with Nos 9, 14, 15, 16, 20 and 31 Squadrons have the data and warnings in both English and German. This feature has been included on Xtradecal X006-72

Squadron markings are repeated on both sides of the aircraft and where these are 'handed' this is mentioned on the placement diagrams.

As RAF Squadrons are re-equipped with the Tornado their markings will be included on future Xtradecals.

Xtradecals should be applied to a gloss paint surface to help eliminate the appearance of the carrier film and the Micro/SuperScale Decal System with Super Set and Super Sol may also be used to give the decals a 'painted on look'. A final coat of Matt varnish should then be applied to the GR1 and Satin varnish to the F3 to achieve the correct finish.

Xtracolor is the only range of 'Decal Ready' gloss authentic paints and all the colours required for these models are available.

For the GR1: X 1 RAF Dark Green; X 4 RAF Dark Sea Grey; X12 Night Black; X141 White.

For the F2/F3: X 3 Medium Sea Grey; X15 Light Aircraft Grey; X17 Barley Grey; X141 White.

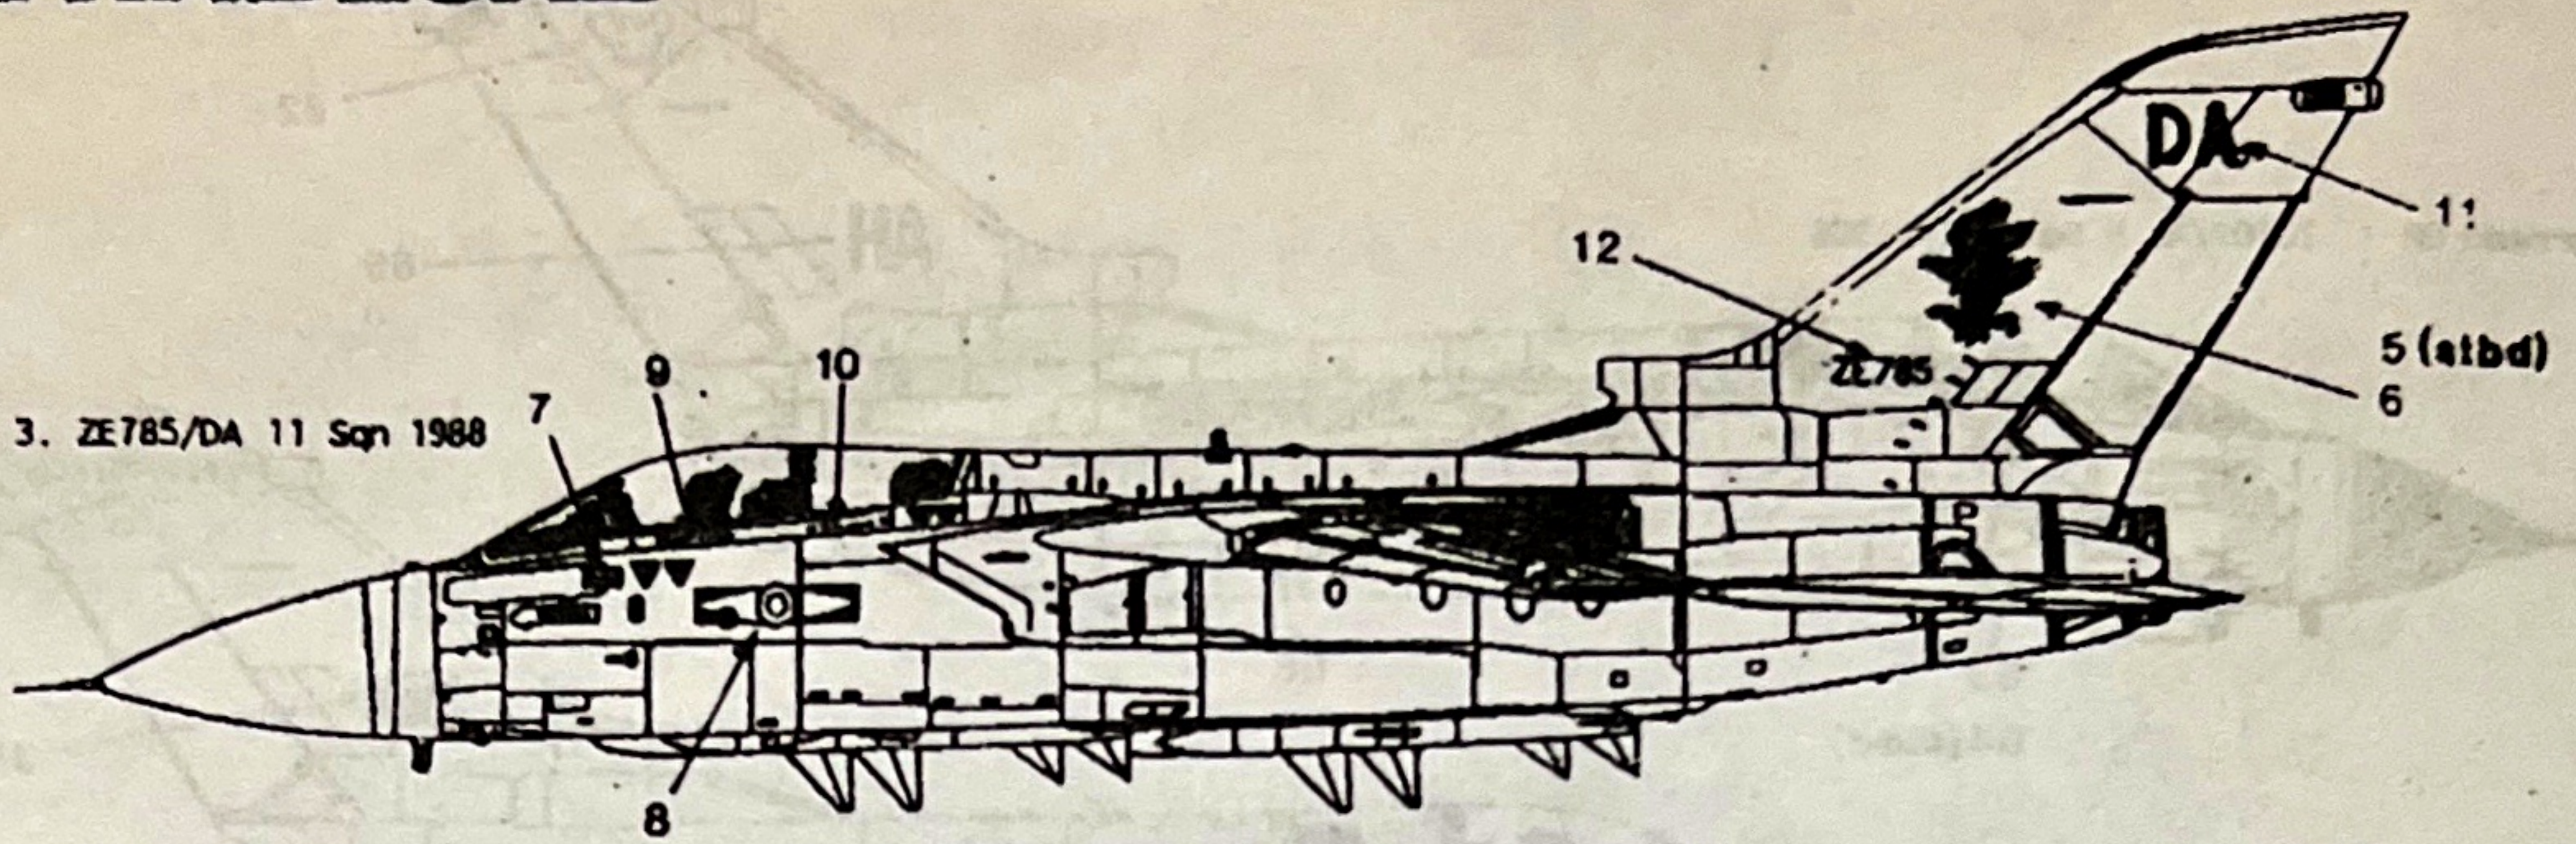

X503 Oily Steel; X504 Exhaust; X505 Tyre Black and Matt Interior colours are also available as is XDG Gloss, XDS Satin and XDF Flat Varnishes.
