Northeast Douglas DC-3
for the
Minicraft 1/144 Scale Kit

last two digits
of registration
number

Northeast's Douglas DC-3 fleet was mostly made up of converted C-47s and C-53s with a few newly delivered DC-3s. Final scheme for the DC-3 composed of a cleaned up cheatline and wings. All titles and registration numbers were removed from top and bottom of the wings.

Paint the top of the fuselage gloss white and the bottom bright bare-metal. Apply decals as shown in the drawings. Notice that the very bottom of the cheatline has a white strip to help with masking of the belly. By the time this scheme was adopted a lot of the aircraft were fitted with the speed-pack sets, however, a few were not and thus there is no conversion required on your part if modeling one of those birds..

Registration Numbers were:

N14967, N16060, N19428, N17891, N19942, N25612, N28323, N28324, N30087, N33622, N33623, N34417, N45362, N45388, N4492, N44998, N65134, N65136, N65282, N65384, N65390.
