### IMPORTANT!

#### READ THESE INSTRUCTIONS FIRST

Before beginning assembly read the instructions through as this will familiarize you with the location of parts, eliminating errors. It is best to use a modeler's knife for removing parts from the "runners", instead of twisting them off. Trim off excess, plastic or "Flash", and join the parts by snapping together according to the pin locations. AMT models are made of the highest quality styrene plastic, so only paint and cement made for styrene should be used. When painting the model, it is easier to build the model completely and paint the whole unit at one time. You should have no trouble assembling your kit if you follow the instructions. May the force be with you.
