BOEING B-17E RAF COASTAL COMMAND FORTRESS II

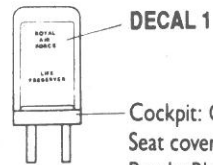

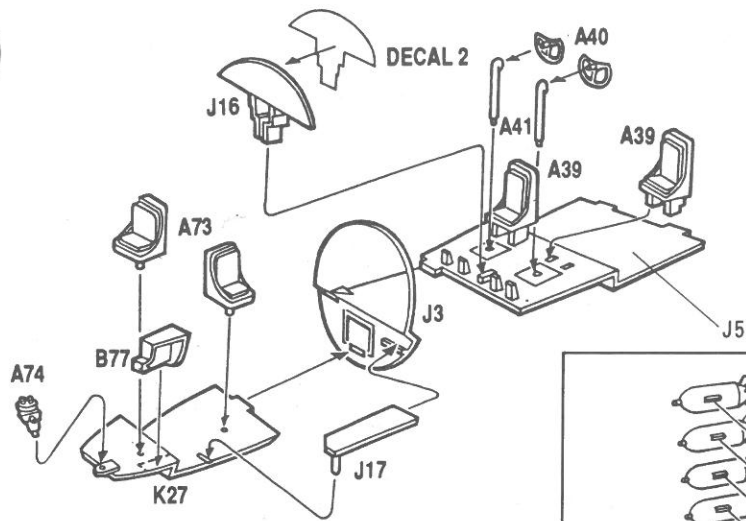

BOEING B-17E RAF COASTAL COMMAND FORTRESS II

The B-17E was a major re-design from the earlier B, C and D versions flown by the US Army Air Force, its entire tail section was changed from the delicate looking tail rudder to a long dorsal fin over a two-gun stinger turret in the rear. Additionally, the "E" received a two-gun power turret on top behind the cockpit and a remote controlled belly turret. For the first time, the B-17 could be called a Flying Fortress with its eight .050 caliber guns.

Purchased in large numbers by the RAF, it was quickly discovered that the eight machine guns were insufficient to defend against fighter attacks over the Continent. The "E" was particularly deficient against nose-on or belly attacks. The single machine gun in the nose was not enough; the remote controlled belly turret was too slow and difficult to aim to be effective.

As a result, the B-17E aircraft were mostly relegated to the Coastal Command where they served with great distinction in the anti-sub role, not having to defend themselves against the Nazi fighters.

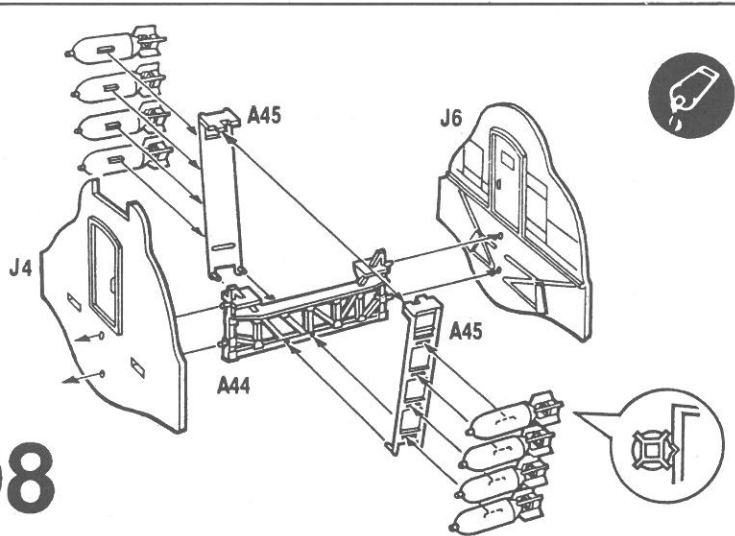

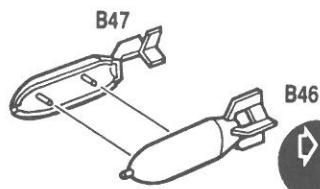

1 Cockpit and bombardiers station assembly

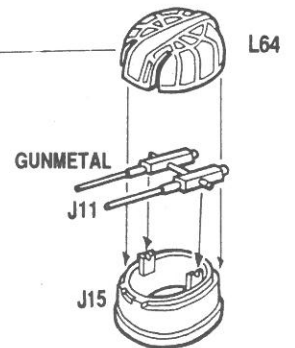

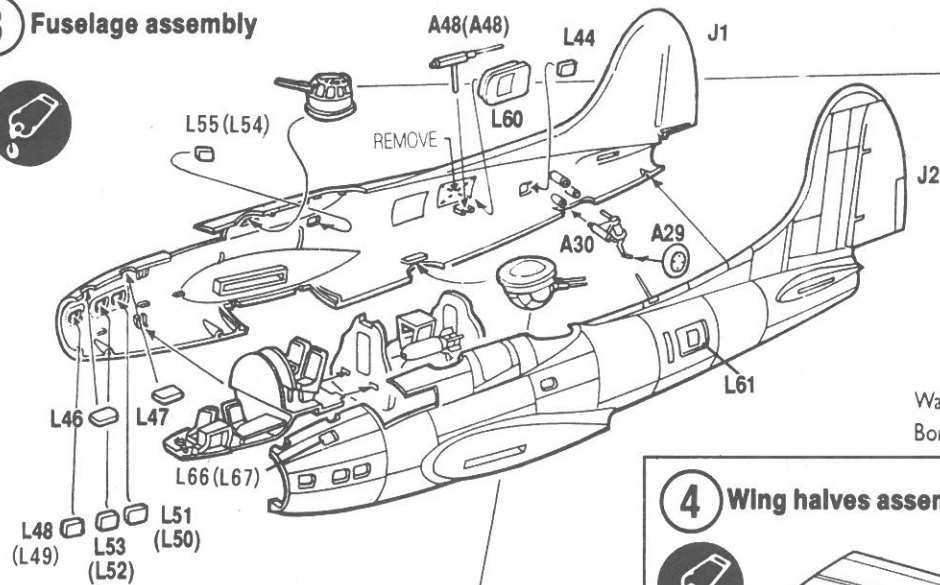

DECAL 1
 Cockpit: Chromate green
 Seat covers: Tan
 Panels: Black
 Steering wheels: Black

2 Bomb bay and weapons assembly

Bomb sight: Black
 Interior: Chromate green
 Bombs: Before 1942 — Yellow
 After 1943 — Khaki

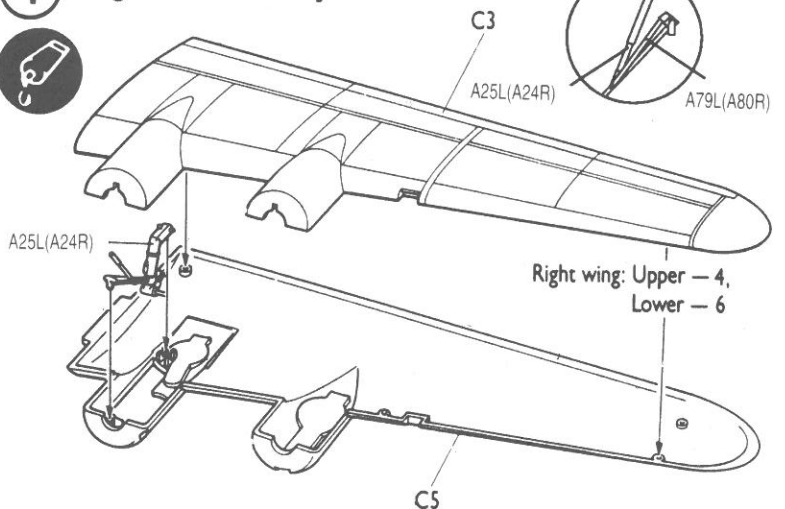

3 Fuselage assembly

Waist gunners' compartment: Chromate green
 Bombardier's compartment: Chromate green, Black panels

4 Wing halves assembly

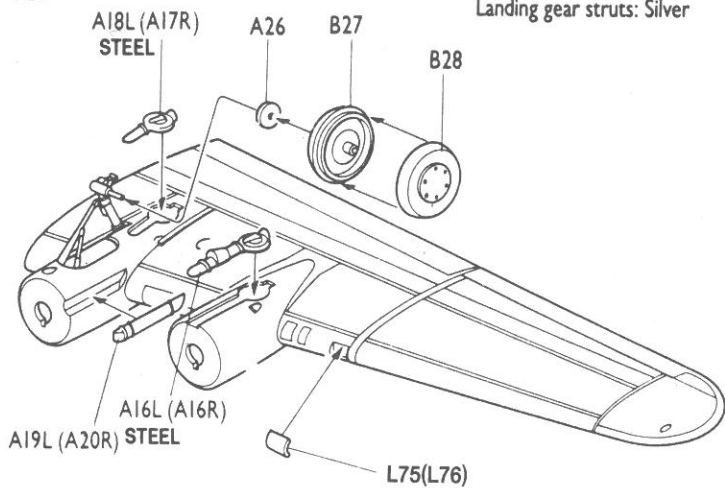

Right wing: Upper — 4,
 Lower — 6

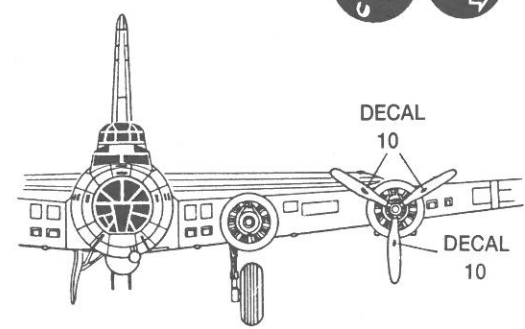

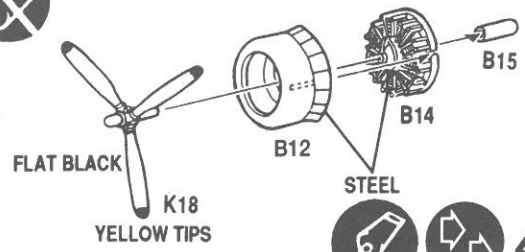

5 Landing gear and supercharger assembly

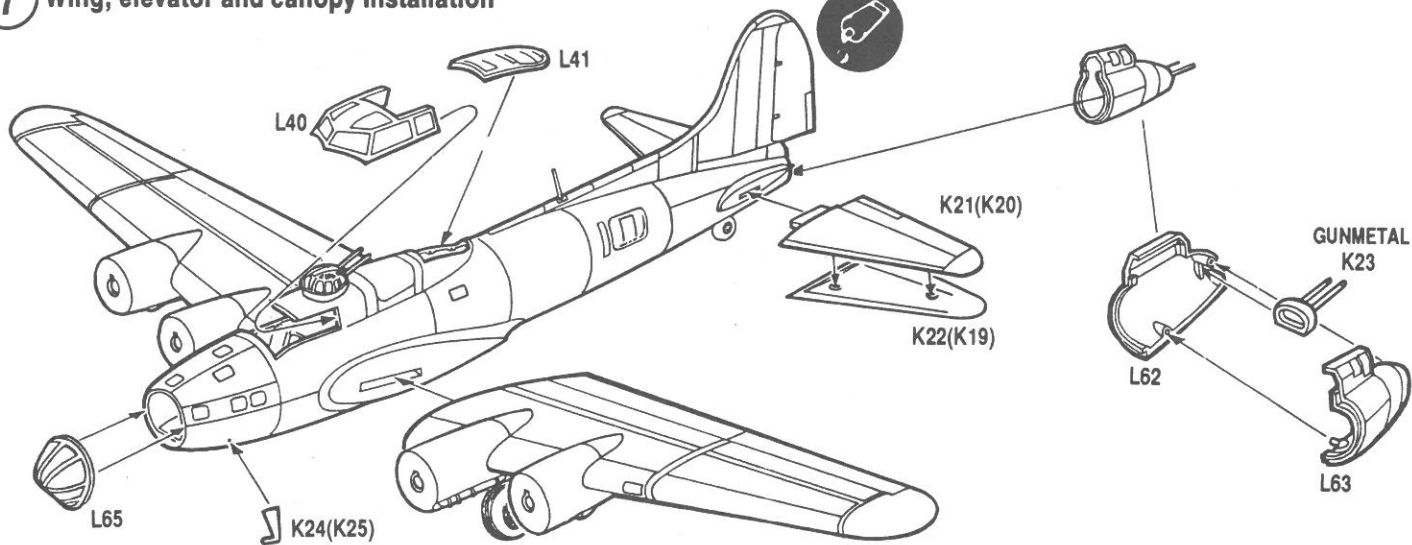

Behind landing gear lights: Silver
 Tire: Black
 Wheel well: Chromate green
 Landing gear struts: Silver

6 Engine and propeller assembly

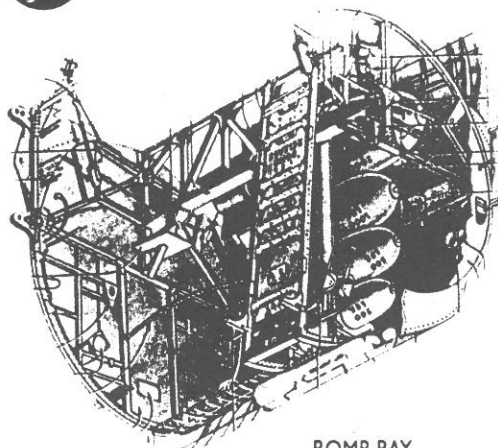

7 Wing, elevator and canopy installation

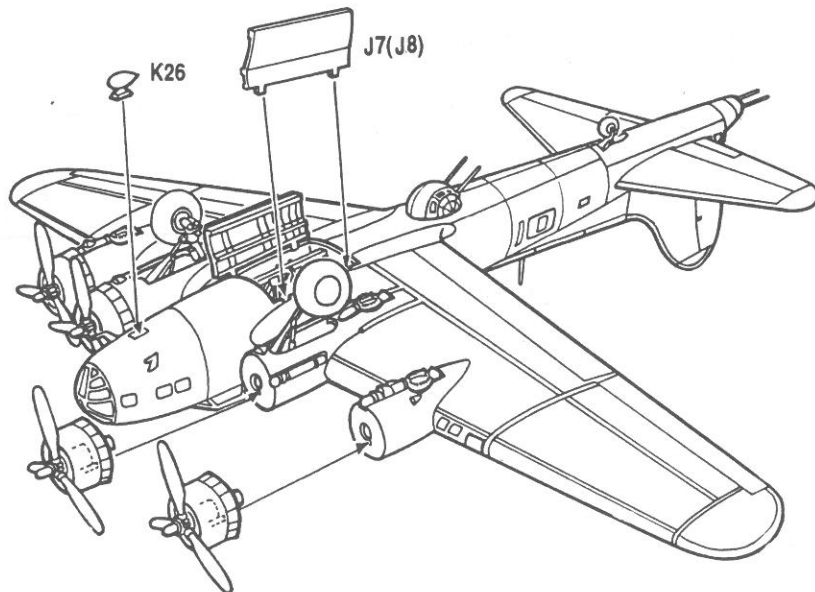

8 Final assembly

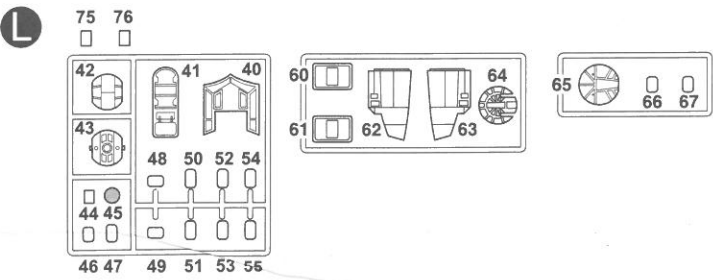

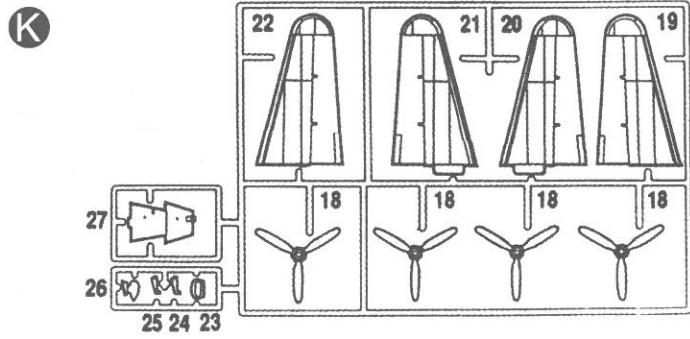

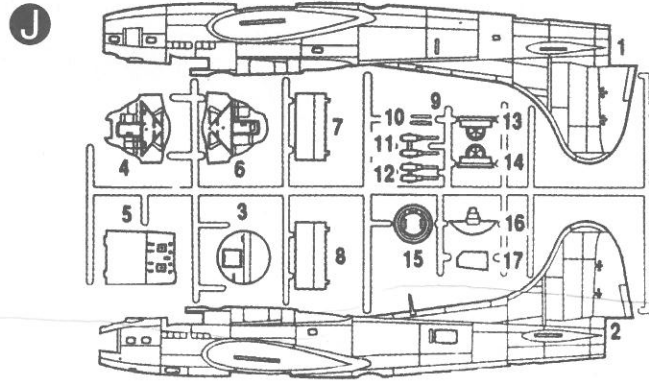

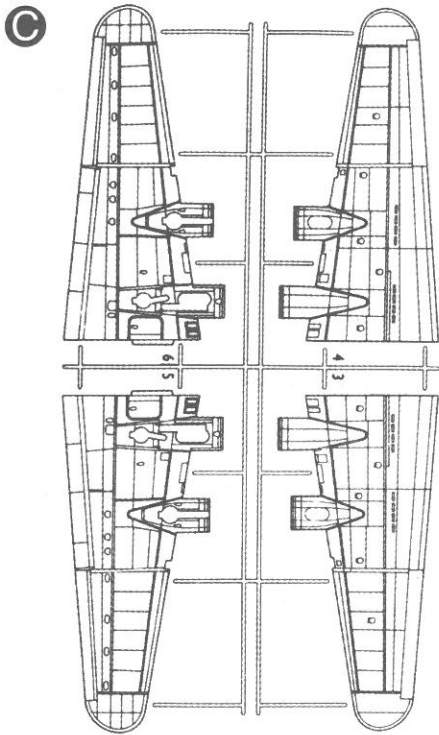

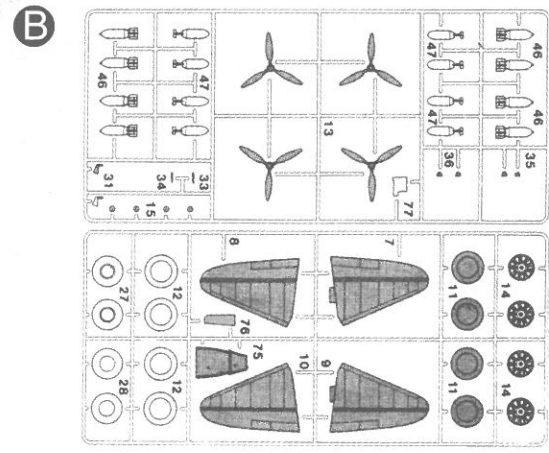

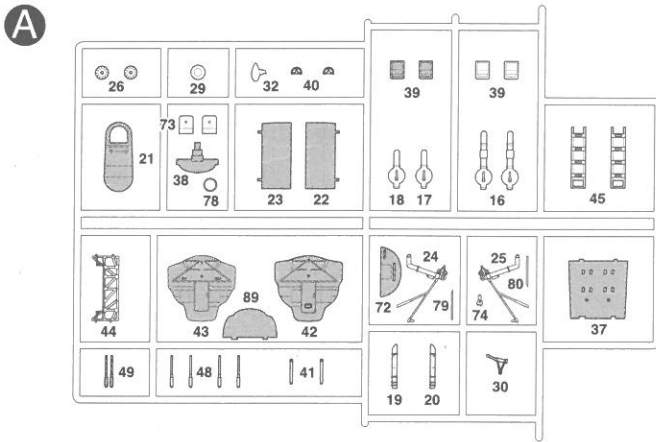

Tail wheel: Black
 Bomb bay door interiors: Chromate green

BOMB BAY
