

# AEROCRAFT MODELS

## 1/72 scale Phantom Pylons for the Airfix kit

This set will enable 2 kits to be modelled with unarmed pylons. Many flew with no fuel tanks or weapons carried.

Supplied is two different inner pylons, one set with the sway braces attached and a second set where the missile rails supplied can be attached.

Four outer pylons are supplied.

Note there are the small pylon attachment brackets / plates supplied as separate parts, note there are two for the inner pylons and one only for the outer pylon. In the pictures below these are assembled to hung on the left / port wing, not in both the inner and outer pylons the more pointy parts face to the wing tip, marked in black line. These will be opposite for the right / starboard pylon and wing layout.
