A50139 SCALE MODEL CONSTRUCTION KIT | Wingspan: 432mm Fuselage Length: 294mm

**GB**

In the time between the British Expeditionary Force evacuation from Dunkirk in 1940 and the successful Allied landings in Normandy in June 1944, the only way that the Allied powers could take the fight to the Germans in occupied Europe was to use the heavy bombers of the RAF and USAAF. For the RAF this meant nocturnal raids over the heavily defended cities of Germany. This was a momentous task, with large numbers of men and equipment involved in each operation. The maintenance, refuelling and rearming of each machine was a long process and one that taxed the often forgotten but vitally important ground crews to the limit. Some helped to raise morale by adorning the bombs with cartoons and special messages, as seen on the 4,000lb bomb here. These men and the brave aircrews, who operated over the continent by night and day, are now remembered by the Bomber Command Memorial in London.

**FR**

Entre le moment de l'évacuation du corps expéditionnaire britannique de Dunkerque en 1940 et le débarquement réussi des Alliés en Normandie en juin 1944, le seul moyen des puissances alliées de combattre les Allemands dans l'Europe occupée était d'utiliser les bombardiers lourds de la RAF et de l'USAAF. Pour la RAF cela impliquait des raids nocturnes sur les villes fortement défendues de l'Allemagne. C'était une lourde tâche, avec un grand nombre d'hommes et de matériel servant à chaque opération. Le long processus de l'entretien, du ravitaillement et du réarmement de chaque avion mettait à l'épreuve les équipes au sol d'une importance cruciale même si souvent oubliées. Certains aidant à remonter le moral en ornant les bombes avec des dessins humoristiques et des messages spéciaux, comme on le voit ici sur la bombe de 1.800 kilos. Ces hommes et les équipages courageux qui survolaient le continent de nuit et de jour sont désormais commémorés par le monument consacré au Bomber Command à Londres.

**DE**

Von der 1940 erfolgten Evakuierung des britischen Expeditionskorps (BEF) aus Dünkirchen bis zur erfolgreichen Landung der Alliierten in der Normandie im Juni 1944 konnten die alliierten Streitkräfte ihre deutschen Gegner im besetzten Europa nur mit dem Einsatz schweren Bombenflugzeuge der RAF und der USAAF angreifen. Für die RAF bedeutete dies fortgesetzte Nachtangriffe aus der Luft auf stark verteidigte Großstädte in Deutschland. Zur Ausführung dieser gewaltigen Aufgabe mussten bei jeder Aktion viele Menschen und umfangreiches Kriegsmaterial eingesetzt werden. Die Wartung, das Auftanken und die Beladung mit Waffen jedes Flugzeugs nahmen viel Zeit in Anspruch und forderten die oft unbeachtet gebliebenen, dabei aber so wichtigen Bodenmannschaften bis an ihre Leistungsgrenze heraus. Zur Hebung ihrer Moral dekorierten manche die Bomben mit Karikaturen und ironischen Botschaften, wie sie auf dieser 1800 kg Bombe zu sehen sind. An diese Mannschaften und die mutigen Bomberbesatzungen, die Tag und Nacht ihre Aktionen über dem europäischen Festland ausführten, erinnert heute das Bomber Command Memorial in London.

**ES**

En el tiempo entre la evacuación de la Fuerza Expedicionaria británica desde Dunquerque en 1940 y el éxito del desembarco aliado en Normandía en junio de 1944, la única forma en que los potencias aliadas podían combatir a los alemanes en la Europa ocupada era mediante el uso de bombarderos pesados de la RAF y la USAAF. Para la RAF, esto significaba incursiones nocturnas sobre las ciudades alemanas, fuertemente defendidas. Fue una misión crucial, y en cada operación intervenían numerosos hombres y equipos. El mantenimiento, repostaje y rearmado de cada aparato constituyó un largo proceso, que exigía un formidable esfuerzo por parte de las tripulaciones de tierra, cuya importancia, aunque muchas veces olvidada, fue crucial. En ocasiones las bombas se adornaban con caricaturas y mensajes especiales, como las que se reproduce en esta bomba de 1800 kg. Estos hombres y las valerosas tripulaciones a bordo de los aviones operaron día y noche en todo el continente, y en la actualidad su esfuerzo se conmemora en el Bomber Command Memorial de Londres.

**SE**

Under perioden mellan evakueringen av British Expeditionary Forces från Dunkirk 1940 och de Allierades framgångsrika landstigning i Normandie i juni 1944 kunde de Allierade endast bekämpa tyskarna i det ockuperade Europa med hjälp av RAF:s och USAAF:s tunga bombplan. För RAF:s räkning innebar detta nattliga röder över Tysklands starkt försvarade städer. Detta var en mycket krävande uppgift eftersom varje enskilt uppdrag krävde många män och omfattande utrustning. Underhållet, bränslepäfyllningen och bestyckningen av varje maskin utgjorde en lång process som testade de ofta bortglömda, men ytterst viktiga marktjänstrupperna, till det yttersta. Vissa ökade moralen genom att rita tecknade figurer och skriva meddelanden på bomberna, som t.ex. på 1 800 kg-bomben i den här satsen. Dessa män och kvinnor samt den modiga besättningen som flog över kontinenten dag som natt förvaras nu i Bomber Command Memorial, London.
