USING **DEK L'S**
MIRROR PRINTED DECALS

DEK L'S
FOR THE ENTHUSIAST

Thank You

Thank you for your purchase of these expertly produced, high quality, short print run decals.

CAUTION: HANDLE WITH CARE

To keep the thickness of the decal to a minimum, it has not been coated. Do not place anything on the face of the decal that may scratch it (ie model kit / tools/ etc).

They are a little different!

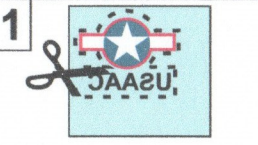

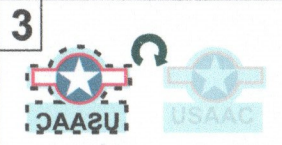

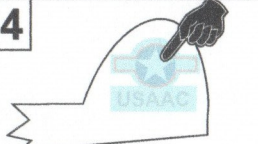

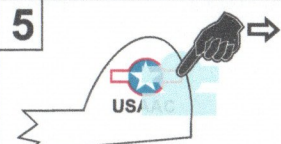

Unlike commercially produced decals, DEK L's are produced as a mirror image. As you see the decal sheet, you are actually looking at the back of the decal. Application requires that you 'flip' the decal over before you apply it. In many ways this makes DEK L's easier to apply, with less chance of 'curling' or clinging to things you don't want them to.

Removal from the sheet

As with most short production run decals these are printed on a single continuous piece of decal film. Decals will need to be carefully cut from the sheet individually.

Whites

Where appropriate, 'whites' are provided as an option, to be placed on the model, before the final decal. Whites should be left to properly set prior to application of the final decal.

<p>1</p>  <ul style="list-style-type: none"> Carefully cut individual decals from the sheet. Mark backing paper indicating correct orientation 	<p>2</p>  <ul style="list-style-type: none"> Place a few drops of water on the model to aid initial adhesion. Wet decal in luke warm water for approx 10-15 sec. 	<p>3</p>  <ul style="list-style-type: none"> Flip the decal over so that the backing paper is facing toward you.
<p>4</p>  <ul style="list-style-type: none"> Place on model with the backing paper facing toward you. Wait 10-15 sec for decal to release from backing paper 	<p>5</p>  <ul style="list-style-type: none"> Gently pressing down, slide the backing paper away. A few drops of water will assist if repositioning is required. 	<p>6</p>  <ul style="list-style-type: none"> Remove air bubbles or excess water by gently pressing down on the decal with a soft cloth.

- Decals adhere best to non porous, gloss surfaces. Use on matt surfaces is NOT recommended.
- Solvents and setters may be used, however they should first be tested on an unused portion of the decal sheet.

Extra Decals

Additional decals not detailed on the instruction sheet may be included. These are provided for known marking variations on specific aircraft. Modellers may wish to use these after consulting references.

Replacement or additional individual decals can be provided for a small fee.

Suggestions or Improvements

I am always open to suggestions for new decals or improvements and I do appreciate your feedback.

Thank You!!

Stencils provided are for multiple versions spanning the life of the type in RAAF service. Multiple variations of a decal are provided for this purpose. Some components may not have been used on the particular aircraft you are modelling. Your reference material should guide your use
