

THIS DETAIL KIT IS MANUFACTURED FROM PHOTO ETCHED BRASS SHEET AND IS FOR USE ON THE AIRFIX KIT. IT COULD, WITH SOME MODIFICATION AND TRIMMING BE USED ON THE FUJIMI VERSION.

TO SEPERATE COMPONENTS USE A SMALL CHISEL OR SHARP STANLEY KNIFE, USING A FIRM CUTTING SURFACE, CUTTING AS NEAR TO THE REQUIRED PART AS POSSIBLE. ANY TAG SCARS CAN BE FILED AWAY USING A FINE FILE HOLDING THE PART FIRMLY IN A PAIR OF PLIERS. TO FOLD COMPONENT, SUPPORT PART FULLY UP TO LINE OF FOLD, THEN FOLD IN ONE GO. SMALL PARTS CAN BE FOLDED BY HOLDING IN PLIERS AND FOLDING OVER WITH THE BLADE OF A SCREWDRIVER, TO THE CORRECT ANGLE.

TO GLUE PARTS TOGETHER USE EITHER SUPERGLUE OR EPOXY, APPLYING WITH A SMALL IMPLEMENT RATHER THAN STRAIGHT FROM THE TUBE.

BEFORE PAINTING ENSURE PARTS ARE FULLY DEFLEXED BY CLEANING WITH WASHING UP LIQUID AND RINSING WITH CLEAN WATER. PARTS SHOULD THEN BE DRIED THOROUGHLY AND PRIMED WITH EITHER SELF ETCHING PRIMER, WHITE OR GREY ENAMEL.

POSITION OF PARTS IN DIAGRAMS ARE FOR GUIDANCE ONLY. COLOURING AND FINAL POSITION SHOULD BE CHECKED AGAINST REFERENCE MATERIAL. WE RECOMMEND THE AEROGUIDE NO.10 AND ALSO VARIOUS MODELDECAL SHEETS. ALSO RECOMMENDED FOR EXTRA DETAIL IS PP AEROPARTS SET AL730 FOR THE SEA KING.

COMPONENTS AND ILLUSTRATIONS BY KEITH MELVILLE. COMPONENTS MANUFACTURED IN ENGLAND BY TIM PERRY FOR E.D. MODELS.
