RW44043  
**F-15E Cockpit Detail Set**  
(Revell kit)

This set is designed to fit the 1/144 Revell F-15E Strike Eagle kit. In order to fit this set into the plastic kit, it is necessary to slightly enlarge the front end of the cockpit opening as seen below:

Then simply replace the plastic cockpit tub by the one included in this set. Separate seats are provided; their bases may need a bit of trimming to fit under a closed canopy, but the seats can be slightly raised if the canopy is shown open.

The fourth part of this resin set is the 'arch' that fits inside the canopy and rests between the rear of the pilot seat and the rear instrument panel.
