

## Mouse Armour Decals

1/35 scale Decals  
MAD632  
Australian Leopard AS1  
Set 4

### Background

The markings for this set have all been sources from within Military Briefs No.5 published by Mouse House Enterprises. These vehicles are from the 1997 to 1980 period.

### Tools

Handy tools would include a sharp model knife and a set of fine nose tweezers and decal setting solution.

### Decal Application.

These decals are printed onto a single sheet of decal paper. This means that you will need to carefully cut through the decal sheet for each decal and then soak it in cold water. The decal will separate from the decal paper fairly quickly – so be watchful. The decal can then be slid on to the model. Be aware that if the model has been painted with matt paints some decal softening solution will need to be applied to avoid the trapping of air under the decal itself and thus eliminate "silvering" of the decals.

### Positioning the decals.

- ARN – left lower glacis plate – see below
- Vehicle name – centre bottom edge of rear hull stowage bin – both sides
- Callsign – on side skirt above third roadwheel – red callsign
- Callsign white – on rear of turret either on a panel or on turret itself
- Leopard Head – forward cheek of turret – both sides
