J.A.S.D.F 航空自衛隊 "しらさぎ"
WHITE HERON
일본항공자위대 KV-107-II-5 "시라사기" 헬리콥터

KV-107-5 Helicopter development

The prototype of the KV-107 series helicopter was designed with twin turbo-shaft engines and tandem rotor blades. Its first flight was on April 1958. US Army designated it YHC-A (later YCH-46C) and made evaluation tests with the intention of using it for troop transport but finally decided to terminate the program. It was later re-designated the V-107II, upgrades were made including more powerful engines, and it made its initial flight on Oct. 25, 1960. In February 1961, the US Marine Corps selected the helicopter to serve as an assault landing mission heli, and designated it as the HRB-1 (later CH-46A).

Service in Japan Self Defense Forces : KV-107II series helicopter :

In Japan, Kawasaki Heavy Industry Company (KHI CO., LTD.) acquired a license to manufacture the helicopter, and launched its first version of the heli in May, 1962. In Japan, Self Defense Forces, Maritime Self Defense Force, selected type KV-107II-3 as a mine sweeping mission heli and Ground Self Defense Force selected type KV-107II-4 as an assault/transportation mission helicopter, finally Air Self Defense Force selected type KV-107II-5 as rescue mission helicopter. In 1967, Air Self Defense Force selected type KV-107II-5, and received the first KHI manufactured KV-107II-5 on November 21, 1967. Later deliveries of KV-107II-5 helicopter were upgraded with more powerful CT58-IHI-140 engines (1,400shp each). These heli's were re-designated as type KV-107IIA-5. 52 were delivered to the JASDF through 1990. Recognizable features include twin steerable searchlights on both sides of the fuselage, bubble windows for search look-out, hoisting gears and two 500 gallon Sponson type fuel tanks also on both sides of the fuselage. It was nicknamed the "SHIRASAGI (White Heron)". Now all KV-107II-5 are out of commission and type KV-107IIA-5 is also being replaced with its successor, UH-60J.

<KV-107-5 ヘリコプターの開発>

KV-107シリーズ・ヘリコプターの原型は、ターボシャフト・エンジン双発でタンデムのローター翼で設計されました。その初飛行は1958年4月22日でした。米陸軍はそれをYHC-1A（後にYCH-46C）と名づけ、部隊輸送に使用する意図で評価テストを行いましたが、結局、その計画を取りやめました。同機は以後、V-107IIと名づけられ、より強力なエンジンを含む改良がなされ、1960年10月25日に初飛行を行いました。1961年2月、米海兵隊が同機を強襲揚陸作戦用ヘリコプターとして採用し、HRB-1（後にCH-46A）と名づけました。

<KV-107シリーズ・ヘリコプターの自衛隊における使用状況>

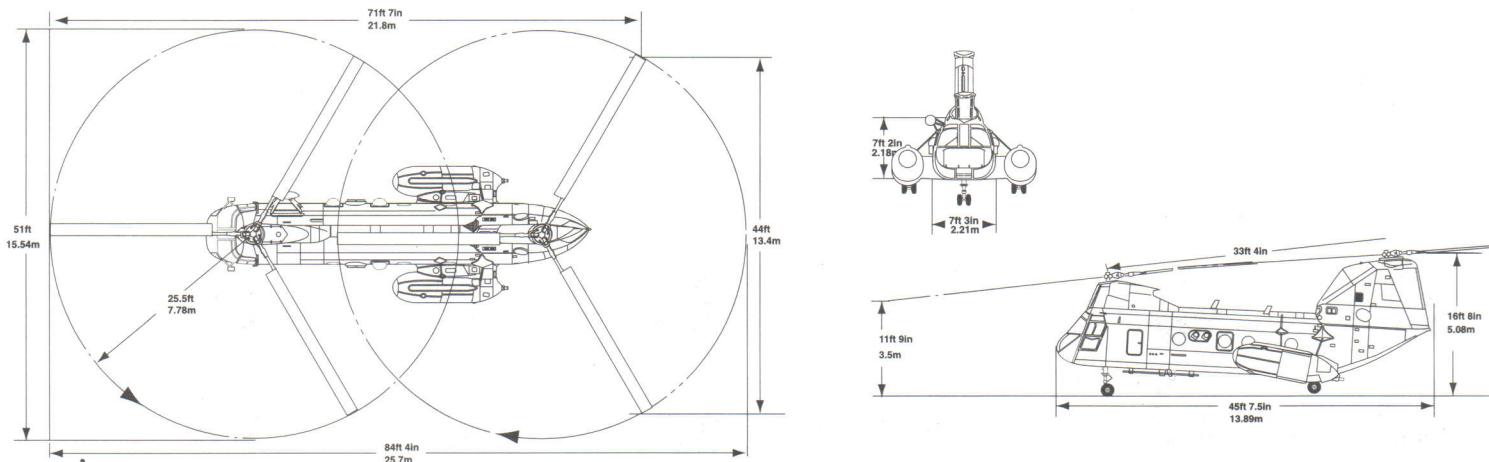

日本では、川崎重工業株式会社（KHI CO., LTD.）が同機の生産ライセンスを獲得し、1962年5月にその初号機を送り出しました。日本の自衛隊では、海上自衛隊がKV-107II-3型を掃海用として、陸上自衛隊がKV-107II-4型を進攻/輸送用として、航空自衛隊がKV-107II-5型を救難用ヘリコプターとしてそれぞれ採用しました。1967年に航空自衛隊はKV-107II-5型を採用し、川崎重工業社製のKV-107II-5型の初号機を1967年11月21日に受領しました。同型機の引渡しの後期には、より強力なCT58-IHI-140型エンジン（1400軸馬力/基）で改良されました。この型のヘリコプターはKV-107IIA-5型と名づけられ、1990年までに52機が引き渡されました。外見上の特徴としては、胴体両側のステアリング可能なサーチライト、探索用張用のバブル窓、救助用ホイストおよび胴体両側に容量500ガロン入りのスポンソン型の燃料タンクを装備しています。同機は「しらさぎ」との愛称で呼ばれています。現在、KV-107II-5型の全機は退役し、KV-107IIA-5型もその後継機のUH-60J型ヘリコプターに置き換えられています。

KV-107-5 Helicopter의 개발

KV-107 헬리콥터 시리즈의 원형(原型)은, 터보 샤프트엔진 쌍발을 채택한 탠덤 회전날개 방식으로 설계되었으며, 1958년 4월 22일, 첫비행에 성공을 거두었다. 당초 이 기종은 미 육군에 의해 YHC-1A(후에 YCH-46C로 명칭변경)로 명명되어, 병력수송 용도에 사용할 목적으로 각종 평가테스트가 실시되었으나 결국 최종채택은 이뤄지지 못한 채 계획이 취소되어 버렸다. 그 후 이 기종은 V-107II로 명칭이 변경되어 보다 강력한 엔진을 탑재하는 개량이 이뤄졌으며, 1960년 10월 25일에 첫비행을 실시하였다. 마침내 1961년 2월, 미 해병대는 이 기종을 강습상륙작전용 헬기로 채용하여 HRB-1 (후에 CH-46A로 명칭변경)란 제식명으로 본격적인 운용을 개시하였다.

KV-107 시리즈 헬리콥터의 일본자위대 사용현황

한편 일본에서는 가와사키 중공업 주식회사(KHI CO., LTD)가 이 기종의 면허생산 자격을 취득, 1962년 5월에 제1호기를 생산하였다. 일본자위대의 경우, 해상자위대가KV-107II-3형을 소해(掃海:기뢰제거)용 헬기로, 육상자위대가 KV-107II-4형을 강습/수송용으로, 항공자위대가 KV-107II-5형을 구조용 헬기로서 각각 채용하였다. 항공자위대의 경우 1967년도에 KV-107II-5형을 채용하였으며, 가와사키 중공업제의 KV-107II-5형의 제 1호기를 1967년 11월 21일에 수령하였다. 아울러 동 기종의 후기 생산분의 경우, 기존 엔진보다 더욱 강력해진 신형의 T58-IHI-140형 엔진(엔진 1기당 1,400 축마력을 발휘가능)을 탑재하는 개량이 실시되게 되는데, 이 개량된 모델은 KV-107A-5형으로 불리며 1990년대까지 52대가 인도되었다. 외형상의 주요 특징으로는, 동체 양옆에 장착된 회전식 서치라이트를 비롯하여 탐색/감시용 물방울형 창문의 채택, 구조용 견인고리 및 동체측면부의 500갤런 짜리 스포ун형 연료탱크를 장비하고 있는 점 등을 확인할 수 있다. 참고로 일본자위대에서는 동 기종을 「시라사기」(しらさぎ:백로)라는 애칭으로 부르고 있다. 현재 KV-107II-5형 전 기체는 이미 퇴역한 상태이며, KV-107IIA-5형 역시 후계기종인 UH-60J헬기와 교체가 진행되고 있다.

<READ THIS BEFORE YOU BEGIN>

- Study the instructions before assembling.
- Do not use too much cement to join parts.
- Open a window or make area well ventilated when cement or paint is in use.
- Check the fit of each piece before cementing into place.
- Never use cement or paint near open flame.
- Tear up and throw away the empty plastic bags to avoid danger of suffocation for little children.

<ALLGEMEINE HINWEISE>

- Die Anordnung der Bauteile ist aus den Zeichnungen der Anleitung ersichtlich.
- Die Teile vor dem Verkleben ungeleimt zusammenhalten, um ihren Paßsitz zu prüfen.
- Klebstoff nicht zu dick auftragen.
- Klebstoff und Farben niemals in der Nähe einer Flamme verwenden.
- Während der Bemalung mit Spritzpistole oder Pinsel für frische Luftzufuhr, z.B. öffnen des Fensters, sorgen.
- Bausatz von kleinen Kindern fernhalten. Verhüten Sie, daß Kinder irgendwelche Bauteile in den Mund nehmen oder Plastiktüten über den Kopf ziehen.

<LISEZ CE QUI SUIT AVANT DE COMMENCER LE MONTAGE>

- Étudier les schémas d'assemblage.
- Contrôler que chaque pièce soit bien conforme avant de la coller à sa place.
- N'utilisez pas trop de colle pour réunir les pièces.
- Ne jamais manipuler la colle ou peinture à proximité d'une flamme.
- Aérer soigneusement la pièce où vous peignez (ouvrir la fenêtre).
- Après avoir sorti les pièces du sac en plastique, déchirer le sac afin dévier que les enfants ne le mettent sur la tête et ne s'étouffent.

<組み立てる前に>

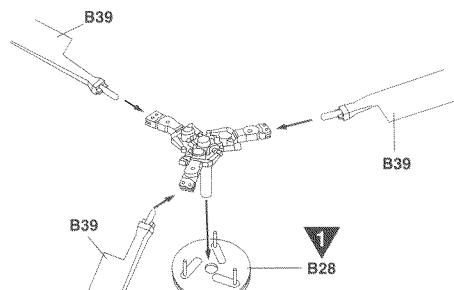

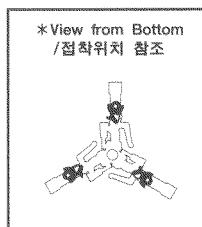

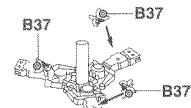

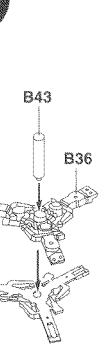

- 組み立てる前に説明書をお読み下さい。 - 部品をランナーから切りはなす時は模型用ニッパーとカッターを使用します。
- 接着剤を少しだけ使うことが出来れば上等です。 - 組み立て後の部品やビニール袋は小さな子供の手の届かない安全な所に保管して下さい。
- 接着剤や塗料を使用する時はときどき窓を開けて換気を気をつけましょう。 - 着色する前に部品を合わせて確かめます。

<조립하기 전에>

- 부품을 조립하기 전에 설명서를 잘 읽어본 후 조립한다.
- 조립하기 전에 부품을 맞추어 확인한 후 조립한다.
- 부품을 지울 때에는 칼이나 나이프로 깨끗이 절라준다.
- 액체형 페인트나 칠기제를 사용할 때는 침문을 열어 환기를 시키고 화기를 멀리한다.
- 접착제를 사용할 곳과 사용하지 않는 곳에 주의하고 나무 많이 놔두지 않도록 한다.
- 사용 후 남은 부품은 어린 아이들의 손에 닿지 않도록 잘 치우친다.
