## **Sherman bolted-together Transmission Housing**

(for Meng World War Toons M4A1 Kit)

This resin conversion kit has been designed to fit the Meng World War Toons Sherman M4A1 kit. The bolted-together transmission housing was a feature of the early production Shermans, including some M4A1s and M4s. The resin parts included in this set replace plastic parts A1. The resin drive sprocket 'stubs' could be replaced with metal tubing for added strength.
