

This set contains high quality aftermarket decals for plastic model kits. Use these decals in order to enhance large scale airplane cockpits as well as military armor kits.

- For best results prepare the surface of your model with a glossy varnish.
- Apply a drop of decal setter and softener to enhance adhesion.
- Let the decals dry for at least 24 hours before covering with clear coat varnish.

Visit www.anyz.de to see all variations, scales and colors of our decals.
