ONTARIO REGIMENT SHERMAN V M4A4 75MM "ACE"

IDENTIFICATION LOCATIONS

These markings represent a M4A4 Mk.V Sherman tank (T-147477) of 'A' squadron 4 troop, Ontario Regiment, 1st Canadian Armoured Brigade as it passes through Via Don Luigi Sturzo, Trecastagni, Sicily 9 August 1943. Although not shown in the picture we have included 5th Armoured Division markings, tactical unit markings, bridge weight marking, and the air recognition roundel that was still being used in this phase of the campaign. These markings would be correct and could have been on this tank at some point. The choice is yours whether to apply these markings or not. Note that this tank has not received the armour plates upgrade on the turret or sides of the hull. Also note the smoke throwers on the side of the turret.

If you add a .50 Cal to your tank these are the decals for the ammo boxes
