FINLAND

This resin conversion kit has been designed to replace dimensionally inaccurate turret from Tamiya kit no. 35059. *Model 43*
The Finnish Army captured one of these distinctive cast pattern turrets in autumn of 1942. After some modifications it was pressed in Finnish Army service with registernumbered R-155. It belonged to 3./Ps.Pr.

For Finnish R-155 see instructions below. If You are building Soviet T-34... cut off the periscopes from turret wall. Also it is recommended to use other references like: Squadron/Signal T-34 in Action.

Build gun and mantlet as advised in Tamiya's instructions.

Sarja sisältää tornin, johtajan ja lataajan luukut. Kahvojen tekemiseen käytä esim. kuparilankaa.
