Alley Cat is a brand of A2Zee Models.

AC72027C – English Electric Lightning Conversion for F.1 and F.3 (For New Airfix F.2A Kit)

1. There are 4 parts supplied in the set. **See Picture 1.**
2. Please check your references for the smaller details that may be required for the version of Lightning that you wish to model, such as the short or long cable ducts and gun ports etc. Some versions maybe easier for some modellers to wait for the F.6 version due by Airfix later in 2014, but for most we are sure you will be able to model the version you want using these parts.
3. **Pictures 2 and 3** show where the kit wing parts require to be cut, also check against the new upper wing parts.
4. **Picture 4 and 5** show where the kit needs cutting to remove the large fuselage tanks and replace with the smaller tank and under fuselage.
5. **Picture 6** shows how the top fuselage should look once the vertical fin is removed if this is required for the aircraft you wish to model.
6. Please wash all parts in warm soapy water. Any parts that would benefit from slight straightening or small adjustments to the shape can be placed in HOT running tap water and with care the modeller can reshape the part.
7. Resin parts only glue with super glues and a mask should be worn when sanding resin parts.
8. To fill resin use "Super Glue" or "Milliput", as these are better fillers to use with resin products. Avoid using styrene fillers, such as "Green Stuff".
9. Should you have any problems with the product or instructions, please feel free to contact me at the address below.

Thank you for supporting us by purchasing this product. We reserve the right to improve the quality of our products. If you have any comments or suggestions we would appreciate hearing, from you.

This kit is intended for modellers with some modelling experience and is not suitable for children. There are sufficient parts to complete one model.
