

# 1:48 Junkers Ju87R-2/B-2 Stuka

A07115 SCALE MODEL CONSTRUCTION KIT | Wingspan: 288mm Fuselage Length: 229mm | Two Decal Schemes Included | Two Build Options

**GB**

The Junkers Ju87 Stuka quickly became one of the most infamous, and feared weapons of the Second World War. The two-man dive bomber first saw action in the skies over Spain during the Spanish Civil War. Here the early A and B models proved themselves to be a very accurate tactical weapon and the screaming noise made by special trumpets added to the machines distinctive undercarriage spats created fear in the hearts of enemy civilians. While outdated in appearance, the Stuka did contain some modern features such as automatic dive brakes but overall the design was outmoded. Over the skies of Poland, France and the Low Countries in 1940 the Stuka was able to operate in clear skies and did so effectively but over the South of England during the Battle of Britain, the Stuka came up against staunch RAF fighter opposition, and suffered as a result. After being withdrawn from this front the Stuka was used in the Balkans and the Western Desert, and continued to serve in Russia, as a tank destroyer, until the end of the Second World War.

**FR**

Le Junkers Ju87 Stuka est rapidement devenu l'une des armes les plus infâmes et redoutées de la Deuxième Guerre mondiale. Ce bombardier en piqué biplace entra en action dans les cieux ou-dessus de l'Espagne pendant la guerre civile espagnole. C'est là où les premières variantes A et B s'avérèrent être une arme tactique très précise. Son bruit strident produit par des sirènes spéciales ainsi que son train d'atterrissement à pantalons caractéristique semaient la terreur parmi les civils ennemis. Même s'il avait l'air démodé, le Stuka disposait de certaines particularités modernes, dont notamment des freins de piqué automatiques, mais dans l'ensemble sa conception était dépassée. En 1940 en Pologne, en France et aux Pays-Bas, les Stuka opérèrent efficacement dans les cieux vides mais au-dessus du sud de l'Angleterre lors de la bataille d'Angleterre ils souffrirent beaucoup en se heurtant à la féroce opposition des chasseurs de la RAF. Après leur retrait de cette première ligne, les Stuka furent utilisés au Balkan et dans le désert de l'Ouest puis en Russie comme chasseurs de chars jusqu'à la fin de la Deuxième Guerre mondiale.

**DE**

Die Junkers Ju 87 Stuka war eines der bekanntesten und gefürchtetsten Kriegsgeräte des Zweiten Weltkriegs. Die für eine Besatzung von zwei Mann als Sturzkampfflugzeug konzipierte Maschine wurde erstmals im Spanischen Bürgerkrieg eingesetzt. Dabei bewahrten sich die bis dahin geheim gehaltenen Versionen A und B als präzise operierende taktische Waffen. Der demoralisierende Heulton ihrer als Jericho-Trompete bekannt gewordene Sirene und ihre von Weitem erkennbaren Radverkleidungen am Fahrwerk verbreiteten bei feindlichen Zivilisten Angst und Schrecken. Obwohl äußerlich veraltet wirkend, war die Ju 87 mit mehreren modernen Einrichtungen ausgestattet, beispielsweise mit automatischen Sturzflugbremsen. Ihre Grundkonstruktion war jedoch nicht mehr auf dem letzten technischen Stand. Im Luftraum über Polen, Frankreich und den Niederlanden operierte die Stuka 1940 bei klarem Himmel mit gutem Effekt. In der Luftschlacht um England, die im Süden des Landes ausgefochten wurde, war sie den Jägern der gegnerischen RAF in vieler Hinsicht unterlegen und musste große Verluste hinnehmen. Nach ihrer Zurücknahme von der englischen Front wurde die Stuka dann im Balkan und in der westlichen

**ES**

El Junkers Ju87 Stuka no tardó en convertirse en una de las armas más temidas y tristemente célebres de la Segunda Guerra Mundial. El bombardero en picado biplaza entró por primera vez en acción durante la Guerra Civil española, donde los primeros modelos A y B demostraron su elevado nivel de precisión táctica. El ensordecedor alarido que producían sus características sirenas montadas en los distintivos faldones inferiores contribuía a sembrar el terror entre los civiles del bando enemigo. Aunque un tanto desfasado en su apariencia general, el Stuka contaba con características modernas, como los frenos de picado automáticos. En 1940, sobre los cielos despejados de Polonia, Francia y los Países Bajos, el Stuka pudo operar sin obstáculos, pero durante la Batalla de Inglaterra, tropezó con la obstinada resistencia de los cazas de la RAF. Tras ser retirado de este frente, el Stuka se utilizó en los Balcanes y en el desierto occidental y también prestó servicio como destructor de tanques en Rusia hasta el final de la guerra.

**SE**

Junkers Ju87 Stuka blev snabbt ett av de mest ökända och fruktade vapnen under det andra världskriget. Den tvåsitsiga störtbombaren användes först under det spanska inbördeskriget i vilket de tidiga A- och B-modellerna visade sig vara mycket precisionsmässiga taktiska vapen, och de luftdrivna sirenerna som monterades på flygplanens distinkta landställen satte skräck i fiendens civilbefolkning. Stukas visuella design var förfärdigad, men planet var utrustat med vissa moderna funktioner som automatbromsar under störtbombning. 1940 användes Stuka effektivt på klar himmel över Polen, Frankrike, Nederländerna, Belgien och Luxemburg, men över södra England under Slaget om Storbritannien mötte Stuka kraftigt motstånd från RAF:s jaktpiloter och åsakkades förluster. Efter att ha dragits tillbaka från fronten användes Stuka på Balkan och i det västra ökenområdet, och användes för pansarbekämpning över Ryssland fram till slutet på andra världskriget.

## Specification

Maximum Speed: 242 mph (390km/h)

Range: 311 miles (500 km)

Wingspan: 45 ft 3.3 in (13.8 m)

Length: 36 ft 1.07 in (11.0 m)

Armament: 3 x 7.92mm machine guns 1 x 250kg (550lb) bomb under the fuselage, 4 x 50kg (110lb) bombs two under each wing.

## Spécification:

Vitesse maximale: 390 km/h

Autonomie: 500 km

Envergure: 13,8 m

Longueur: 11,0 m

Armement: trois mitrailleuses de 7,92 mm, une bombe de 250 kg sous le fuselage, quatre bombes de 50 kg dont deux sous chaque aile.

Wüste von Nordafrika eingesetzt. Außerdem war sie in der Sowjetunion bis Kriegsende als Panzerjäger in Verwendung.

## Spezifikation:

Höchstgeschwindigkeit: 390 km/h

Reichweite: 500 km

Spannweite: 13,8 m

Länge: 11,0 m

Bewaffnung: drei 7,92 mm MG; eine 250 kg Bombe unter dem Rumpf; vier 50 kg Bomben unter den Flügeln (zwei an jeder Seite).

## Especificación:

Velocidad máxima: 390 km/h

Autonomía: 500 km

Envergadura: 13,8 m

Longitud: 11,0 m

Armamento: 3 ametralladoras de 7,92 mm; 1 bomba de 250 kg bajo el fuselaje; 4 bombas de 50 kg, dos bajo cada ala.

## Specifikation:

Maximal hastighet: 390 km/h

Räckvidd: 500 km

Spannvidd: 13,8 m

Längd: 11,0 m

Bestyckning: 3 st. 7,92 mm-kulsprutor, 1 st. 250 kg-bomb under skrovet och 4 st. 50 kg-bomber, två under vardera vingen.

## FOR BEST RESULTS:

Surfaces to be painted should be clean – before parts are removed from the sprue, wash in warm, soapy water, rinse and dry thoroughly. Stir paints thoroughly before use.

## PLEASE NOTE:

Some parts in the kit may not be required to build the model specified.

HOBBIES**

## ASSEMBLY INSTRUCTIONS

**GB** Study drawings and practise assembly before cementing parts together. Carefully scrape paint from cementing surfaces. All parts are numbered. Paint small parts before assembly. To apply decals cut sheet as required, dip in warm water for a few seconds, slide off backing into position shown. Use in conjunction with box artwork. Not appropriate for children under 36 months of age, due to the presence of small detachable parts.

**FR** Étudier attentivement les dessins et simuler l'assemblage avant de coller les pièces. Gratter soigneusement toute peinture sur les surfaces à coller. Toutes les pièces sont numérotées. Peindre les petites pièces avant l'assemblage. Pour coller les calcomanies, découper le motif, le plonger quelques secondes dans de l'eau chaude puis le poser à l'endroit indiqué en décollant le support papier. Utiliser conjointement avec les illustrations sur la boîte. Ne convient pas aux enfants de moins de 36 mois – présence de petits éléments détachables.

**DE** Vor dem Zusammenkleben der Teile die Zeichnungen sorgfältig ansehen und die zu verklebenen Teile zur Vermeidung möglicher Fehler versuchsweise zusammenfügen. Dann an den Klebeflächen vorhandene Farbeschichtung vor dem Zusammenkleben vorsichtig abkratzen. Alle Bestandteile sind mit Nummern versehen. Kleine Teile vor dem Zusammenbau bemalen. Abziehbilder wie gewünscht ausschneiden. Vor dem Anbringen einige Sekunden in warmes Wasser tauchen und dann vom Trägerpapier in ihre vorgesehene Position schieben. Dabei die Abbildungen auf der Schachtel beachten. Nicht für Kinder unter 36 Monaten geeignet, da abnehmbare bzw. lose angebrachte Kleinteile enthalten sind.

**ES** Estudiar los dibujos y practicar el montaje antes de pegar las piezas. Raspar cuidadosamente la pintura en las superficies de contacto antes de pegar las piezas. Todas las piezas están numeradas. Es conveniente pintar las piezas pequeñas antes de su montaje. Para aplicar las calcomanías, cortarlas de la hoja, sumergirlas en agua tibia durante unos segundos y deslizarlas a la posición indicada. Utilizar en conjunción con la ilustración de la caja. No es adecuado para niños menores de 36 meses, ya que contiene piezas pequeñas que podrían soltarse.

**IT** Studiare i disegni ed esercitarsi a montare i vari pezzi prima di fissarli con la colla. Raschiare con cura le tracce di vernice dalle superfici da incollare. Tutti i pezzi sono numerati. Verniciare i pezzi di piccole dimensioni prima di montarli. Per applicare le decalcomanie, ritagliare il foglio nel modo richiesto, immergere in acqua calda per alcuni secondi, quindi staccare la decalcomania dalla carta di supporto e posizionarla nel punto desiderato. Usare le decalcomanie come indicato nell'illustrazione riportata sulla confezione. Non adatto a bambini di età inferiore a 36 mesi per la presenza di componenti di piccole dimensioni che potrebbero staccarsi.

**DK** Studér tegningerne nøje og forsøg at sætte delene sammen, inden du kleber dem. Skrab forsigtigt malingen af de overflader, der skal klebes sammen. Alle dele er nummererede. Smaa dele skal males, før de monteres. Overføringsbillederne påføres ved at klippe dem ud af arket, som påkøvel, dyppe dem i varmt vand i nogle få sekunder, hvorefter underlaget glides af i de viste positioner. Påføres ifølge illustrationerne på æsken. Ikke egnet til børn under 3 år på grund af tilstedsvarerelse af små aftagelige dele.

**NL** Tekeningen bestuderen en delen in elkaar zetten alvorens deze te lijmen. Lak voorzichtig van lijmlakken afschrapen. Alle delen zijn genummerd. Kleine delen vóór montage verven. Voor aanbrengen van stickers, gewenste stickers uit het vel knippen, een paar seconden in warm water dompelen en dan van het schutblad af op aangegeerde plaats schuiven. Hierbij afbeelding op doos raadplegen. Niet geschikt voor kinderen onder 3 jaar, omdat kleine deeltjes gemakkelijk kunnen losraken.

**SE** Studera bilderna noggrant och sätt ihop delarna innan du limmar ihop dem. Skrapa försiktigt bort färg från limmades delar. Alla delarna är numrerade. Måla smärdelarna före ihopståtningen. Sätt fast dekalerna genom att klippa arket, doppa i varmt vatten några sekunder och låta baksidan glida på plats som bilden visar. Använd enligt bildanvisningarna på kartongen. Recomenderas ej för barn under 3 år. Innehåller löstagbara smädelar.

**FI** Tutustu piirroksiin ja harjoittele kokoamista, ennen kuin liimata osat yhteen. Raaputa maali varovasti pois liimattavilla pinnilla. Kaikki osat on numeroitu. Maala kaikki pienet osat ennen kokoamista. Siirtokuvien kiinnittämiseksi leikkaa leikkauspaperista tarpeen mukaan. Kasta kuva lämpimään veteen muutaman sekunnin ajaksi, anna takapuolen liukua kuvalle osoitettuun kohtaan. Kaytetaan yhdessä laatikon kuvituksen kanssa. El suositella alle kolmivuotaille lapsille. Paljon irottettavia pikkuosia.

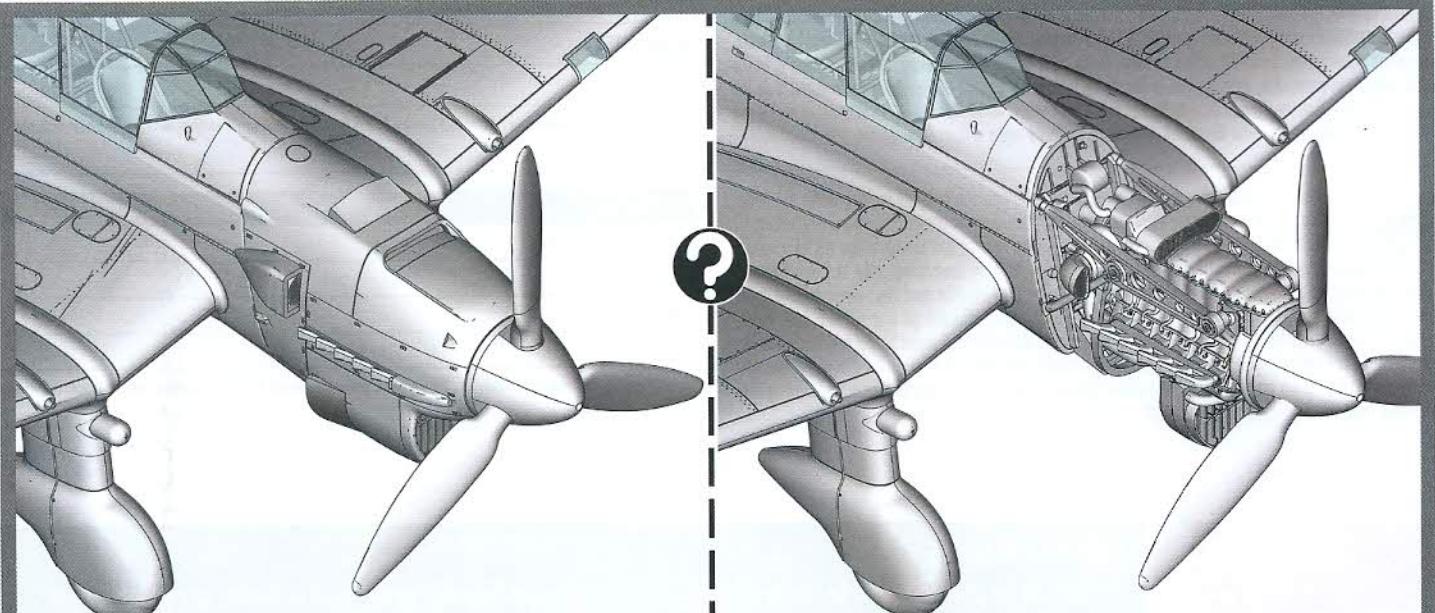

**PT** Estudar atentamente os desenhos e experimentar a montagem. Raspar cuidadosamente as superfícies de modo a eliminar pintura antes de colar. Todas as peças estão numeradas. Pintar as pequenas peças antes de colar. Para aplicar as decalcomanias, cortar as folhas e mergulhar em água morna por alguns segundos, depois deslizar e aplicar no respectivo lugar, como indicado nas ilustrações na caixa. Não convém a uma criança de menos de 36 meses devido à presença de pequenos elementos destacáveis.

**PL** Przed przystąpieniem do klejania przedstudiuj uważnie rysunki i przełącz sklejanie części. Ostrożnie zeskroluj ze sklejanych powierzchni farbe. Wszystkie części są ponumerowane. Drobne części pomaluj przed ich złożeniem. Celem przeniesienia kalkomanii wyciągnij ją z arkusza, zanurz na kilka sekund w lejnej wodzie i zsuń z podłożu na wymagane miejsce. Używaj w połączeniu ze wzorami na pudełku. W związku z obecnością wielu drobnych, rozbierejących części, nieodpowiednie dla dzieci poniżej 3 lat.

**EL** Μελετήστε προσεκτικά τα σχέδια και συναρμολογήστε για πρώτη φορά τα κομμάτια χωρίς να τα συγκλόψετε. Αφαιρέστε επιμέλως τη πλαστική βαρί από την επιφάνειας της οποίας θα συγκλόψετε. Όλα τα κομμάτια είναι αριθμημένα. Χωριστήστε τα μικρά κομμάτια πριν από τη συναρμολόγηση. Για να κλήσετε τις χαλκομείς, κόψτε γύρω από το σχέδιο όπως απαιτείται, βιβήστε το μερικά δευτερότεττα σε χιλιόν γράμματα και μετά τοποθετήστε το στη θέση που υποδεικνύεται, αφαιρώντας τη μεμβράνη που το καλύπτει. Λαβέτε υπόψη σας ταυτόχρονα την εικονογράφηση του κουπού. Ακατάλληλο για παιδιά ηλικίας κάτω των 36 μηνών λόγω υπάρχεις μικρών κομματιών που αποσπώνται.
