

Panavia Tornado GR.1. RAF

Panavia Tornado GR.1. RAF GERMANY

Panavia Tornado F2/3

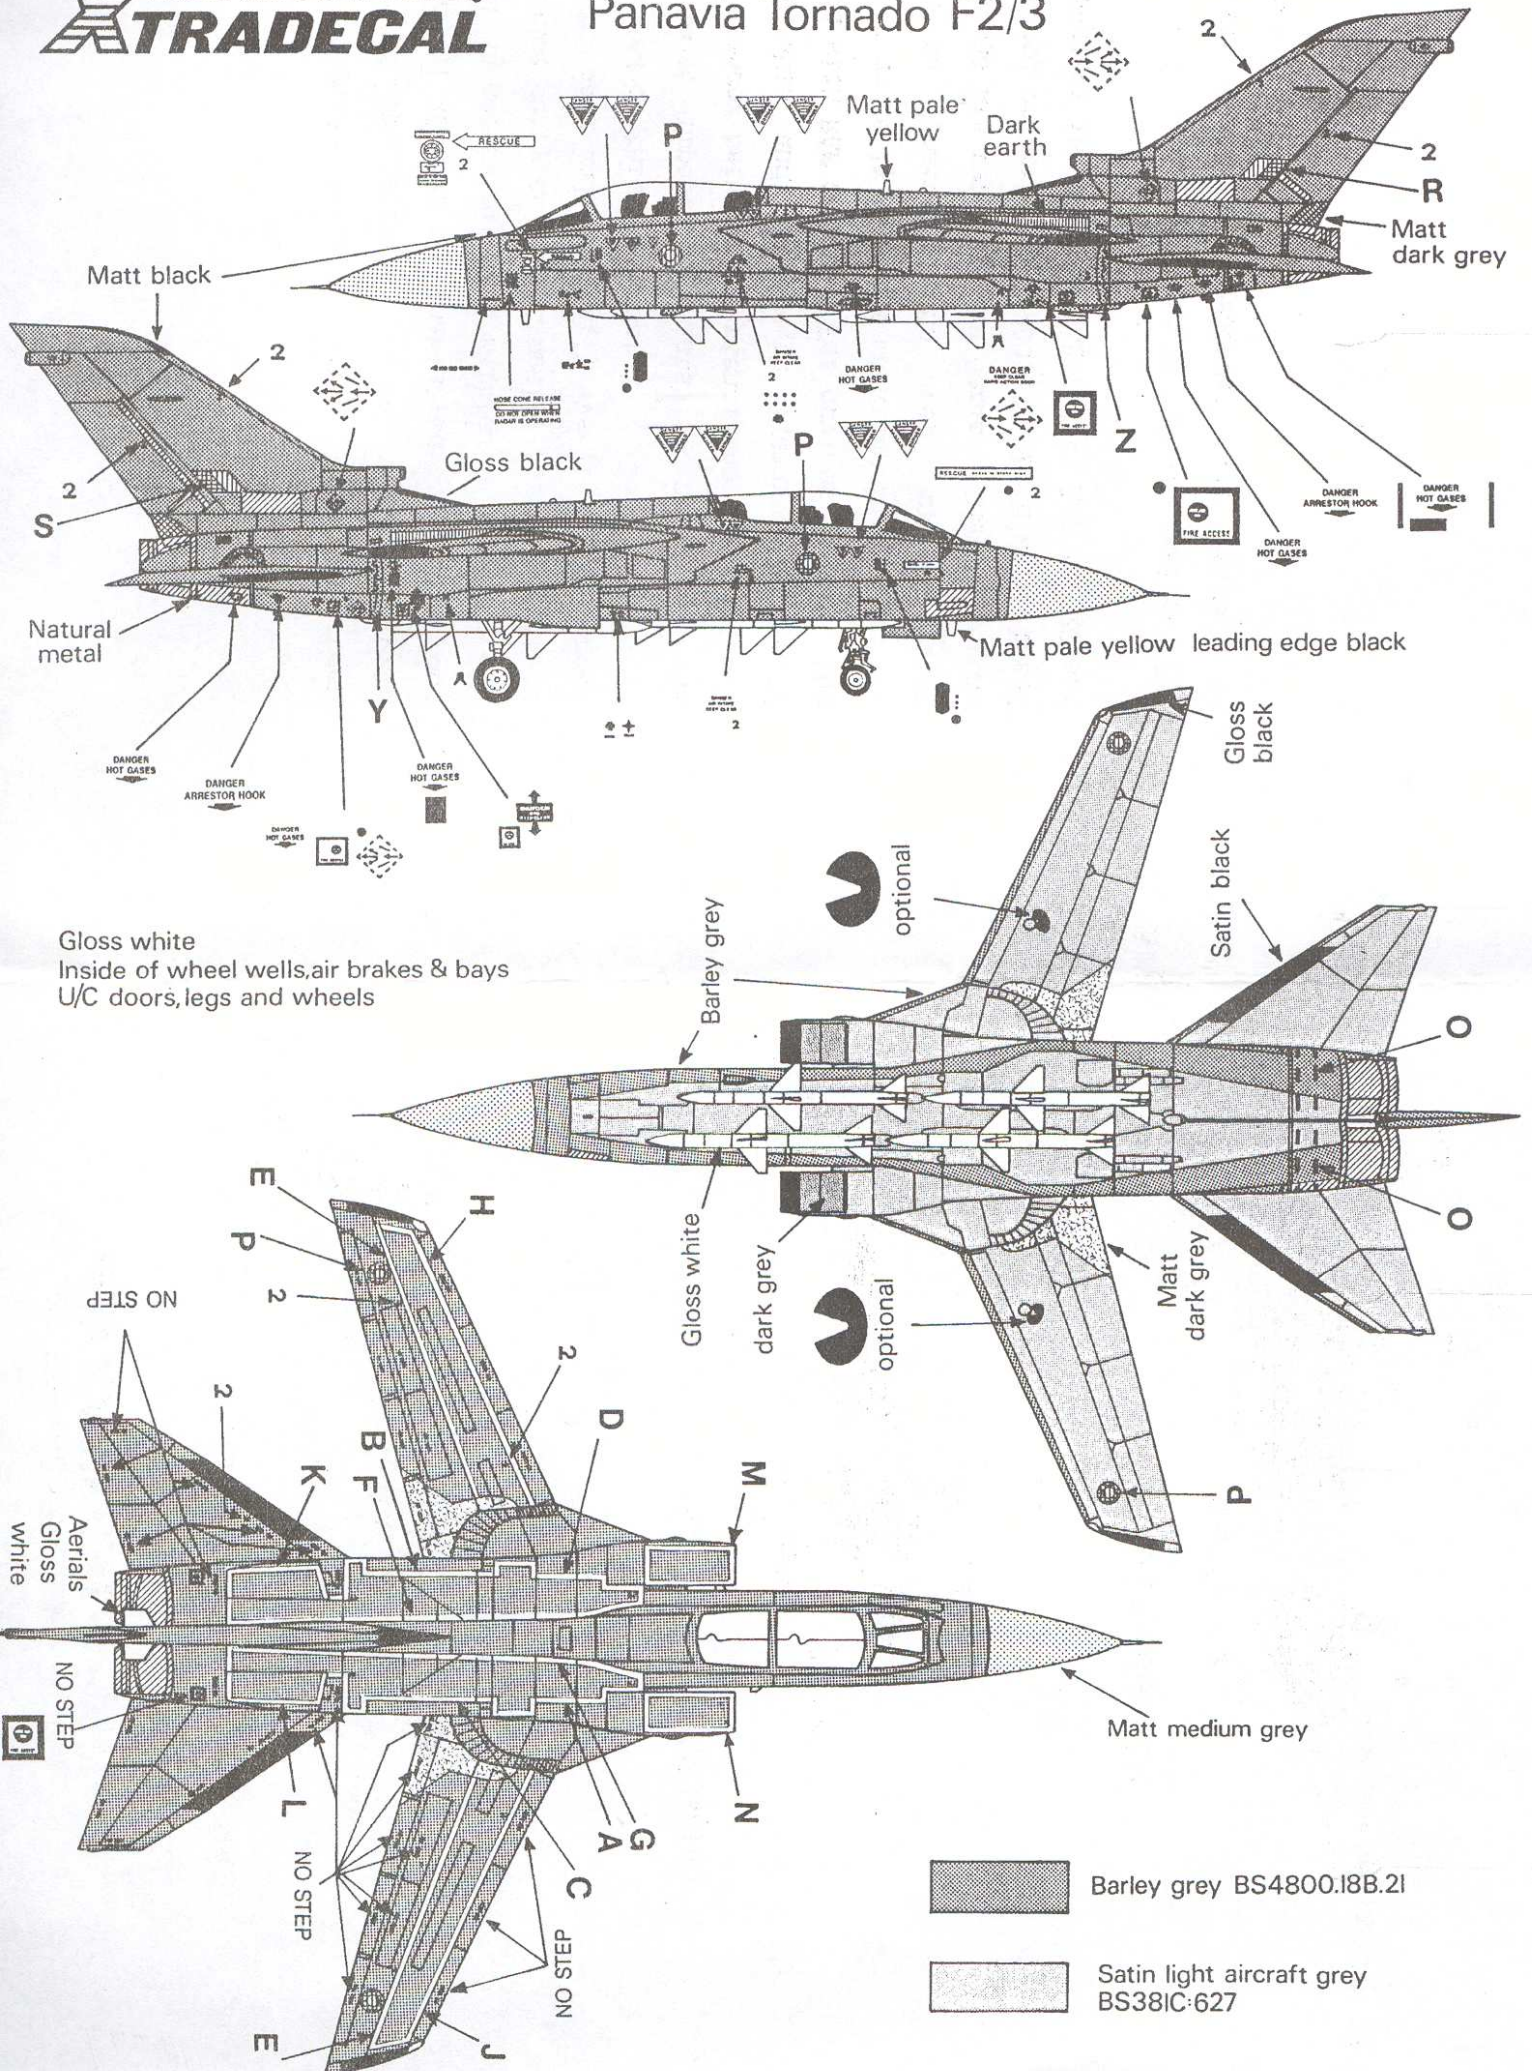

This Tornado Stencil Data decal has been produced especially for use in conjunction with Xtradecal X005-72 to enable you to finish your model as accurately as possible. Tornados carry an exceptionally large amount of stencil data and virtually everything has been included on this Xtradecal.

The most important points to note are the differences between the stenciling carried on UK based GR1s and those with Squadrons normally based with RAF Germany. For obvious reasons, the latter not only have the markings in English but such as "rescue", "no step" and ejection warnings are repeated in German. The Squadrons included on Xtradecal X005-72 which were based in Germany in 1988 are Nos 9, 14, 15, 16, 20 and 31.

The small red/blue roundels "X" are included for use on Tornado F2 ZD935 with the Empire Test Pilots School.

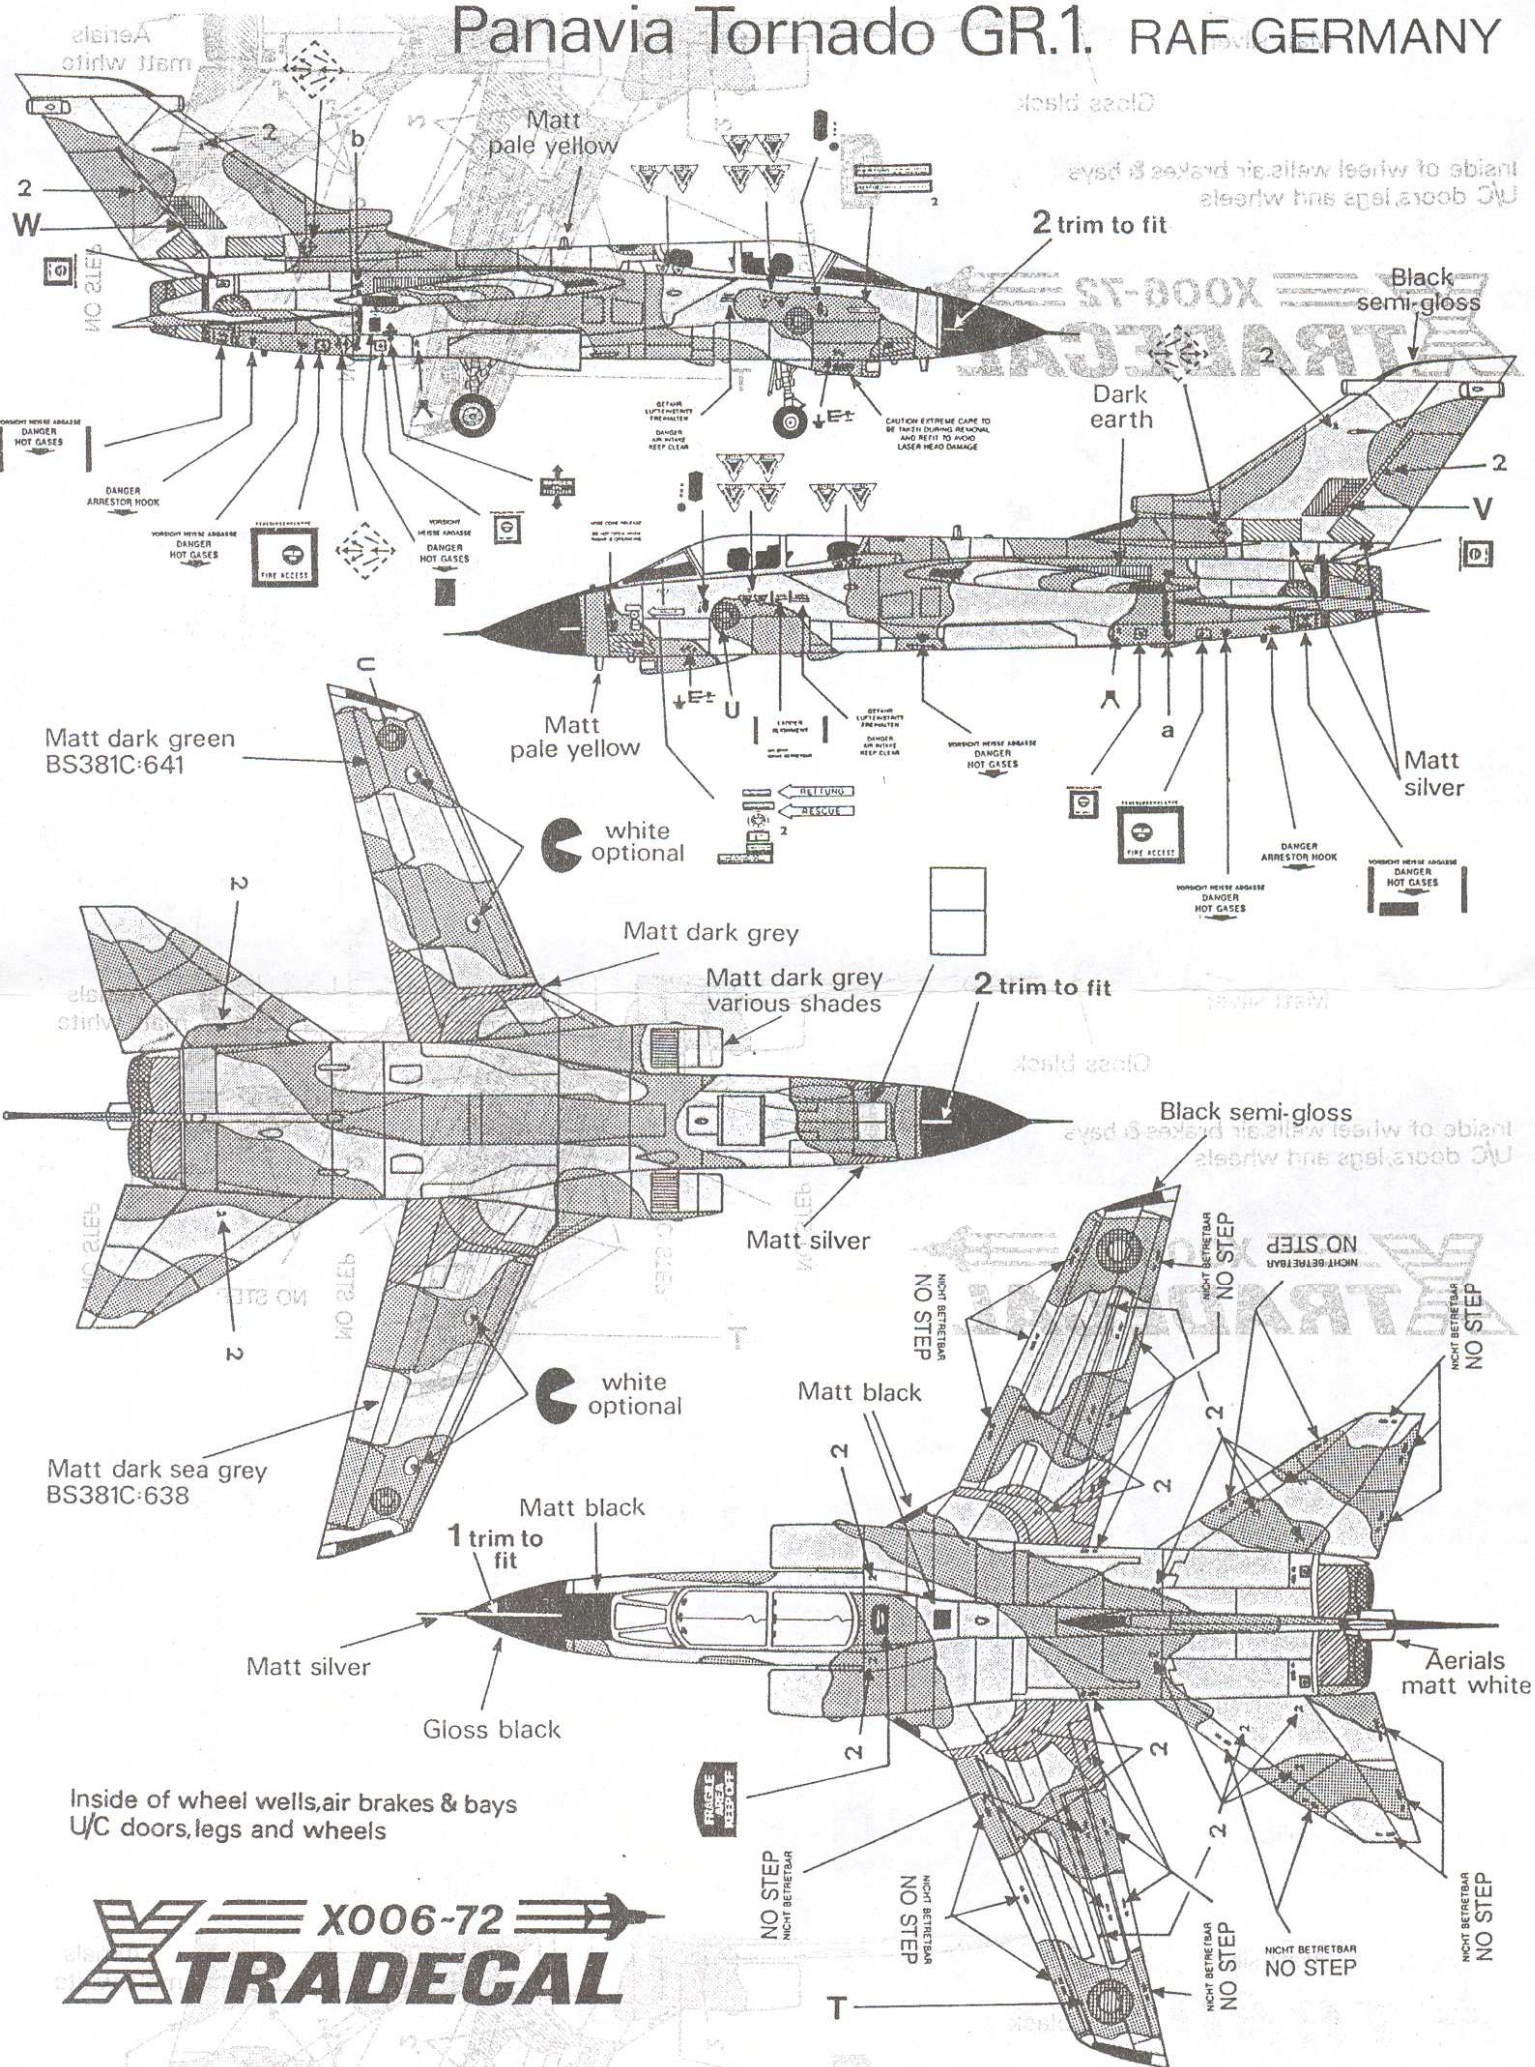

Panavia Tornado F2/3

Gloss white
 Inside of wheel wells, air brakes & bays
 U/C doors, legs and wheels

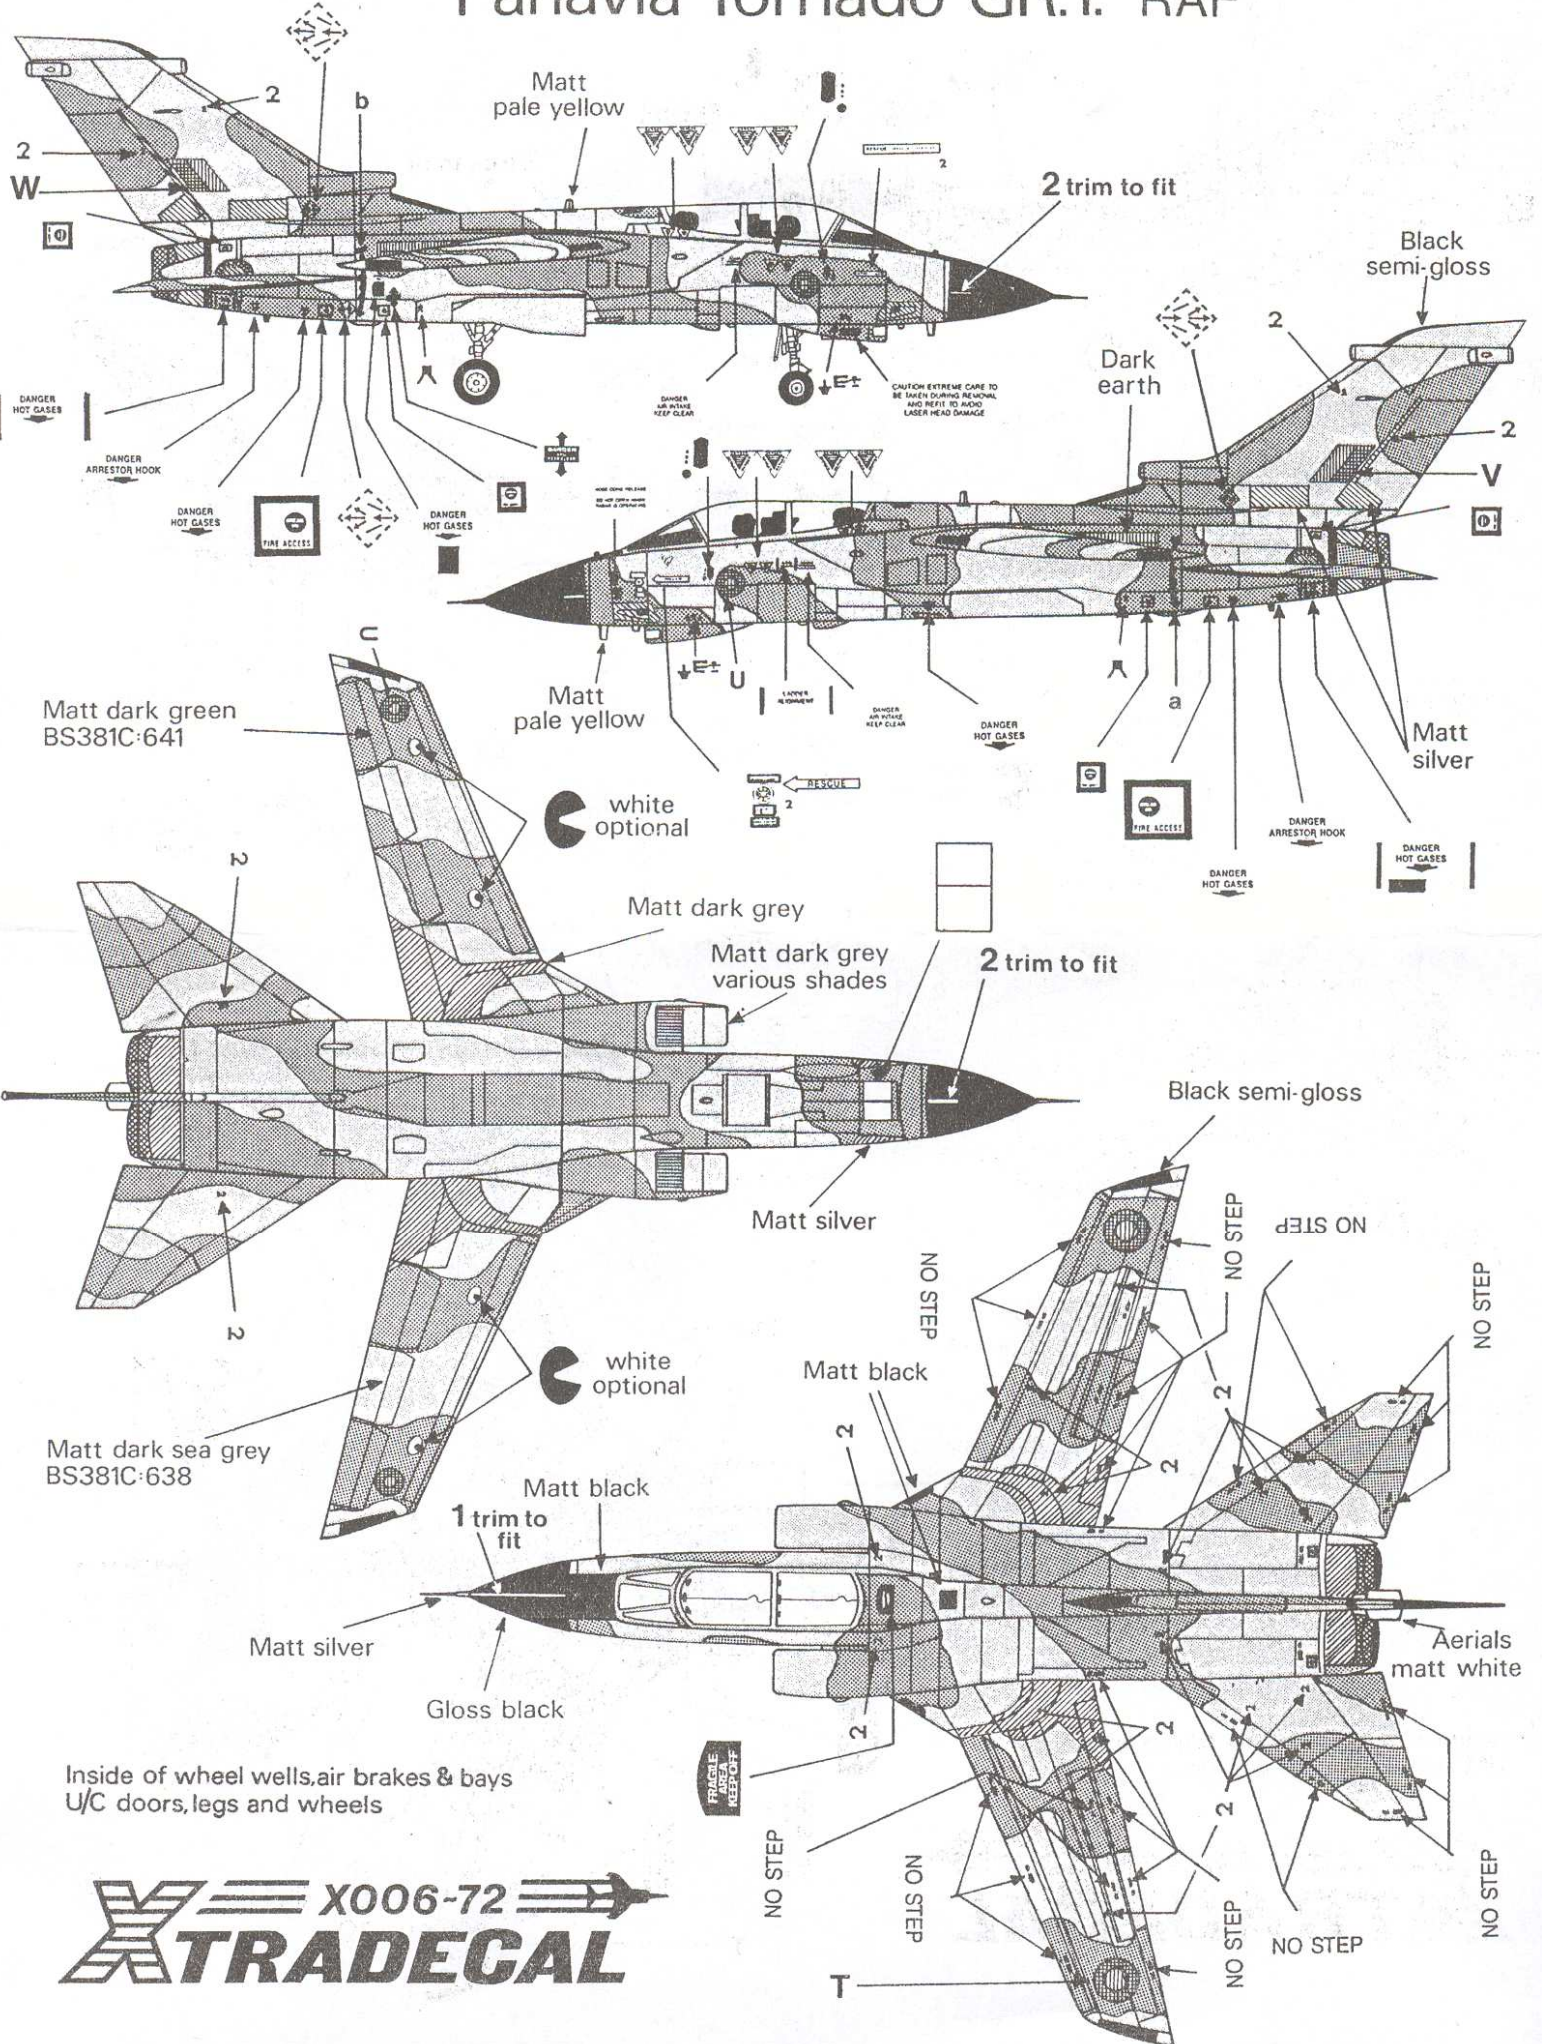

-  Barley grey BS4800.18B.21
