

These are just general guidelines for painting the wings. Some aircraft have both the top and bottom of the wings painted Boeing 707 Gray with a bare-metal leading edge. Check your references for the exact aircraft you are modeling.

Federal Express Corporation, better known as FedEx, has been flying the venerable Boeing 727 for over two decades. Operating both the -100 as well as the -200 stretch series. Several aircraft were purchased direct from Boeing, however, many used aircraft have been added from various airlines over the years and a slight configuration in the number of windows on each side of the fuselage is present. All doors, except the very first door on the left side, have been blanked out and are not functional. The current scheme was adopted in the mid 1990s and has changed very little since. The only change we anticipate in the coming months is the switch from "Federal Express" to just "Express" under the fuselage titles. The larger "Express" lettering on the decal sheet is to be used for this purpose if it actually becomes reality. We anticipate this move as several aircraft have had this change, as well as all the delivery trucks seen on the roads across the World. If the change does not become permanent then no extra work is required. Nonetheless, you may wish to leave the decal as is depending on your preference. Paint the upper-fuselage gloss white and the belly bare-metal and Boeing Gray as appropriate. You may wish to mix and match the purple that is on the decal sheet or use Xtracolor X303 for a great match. Notice that the purple on the fuselage does not wrap completely around from one side to the other, but is instead separated by the bare-metal area. One unique feature of all FedEx aircraft is the ship name on the left nose area. The aircraft are named after new children of FedEx employees. One name that certainly stands out among all of them is "Two Bears". Feel free to name your aircraft whatever you wish. Take your pick from the hundreds of names provided below. These are the names and registration number combinations we've been able to locate. There probably are more, but the selection should be enough to satisfy almost any taste.
