

USAF / IAF C-130J-30 Conversion set

For Italeri C-130J kit

Resin parts

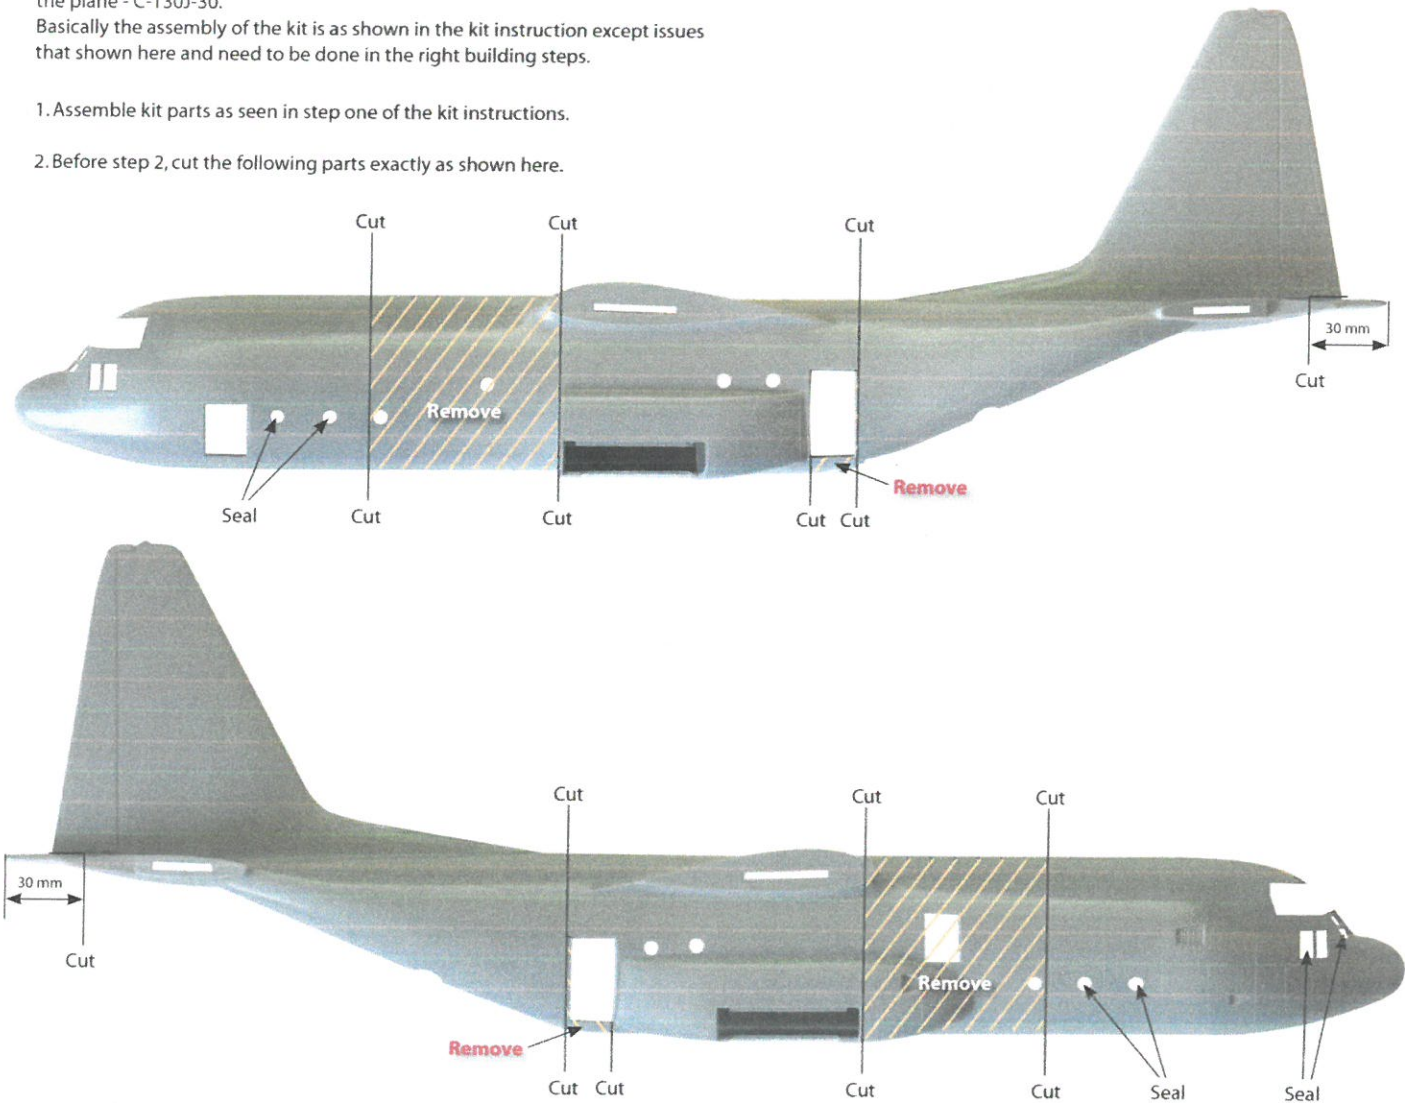

Assembly Instructions

The conversion is set to convert the short C-130 of Italeri to the stretch version of the plane - C-130J-30.

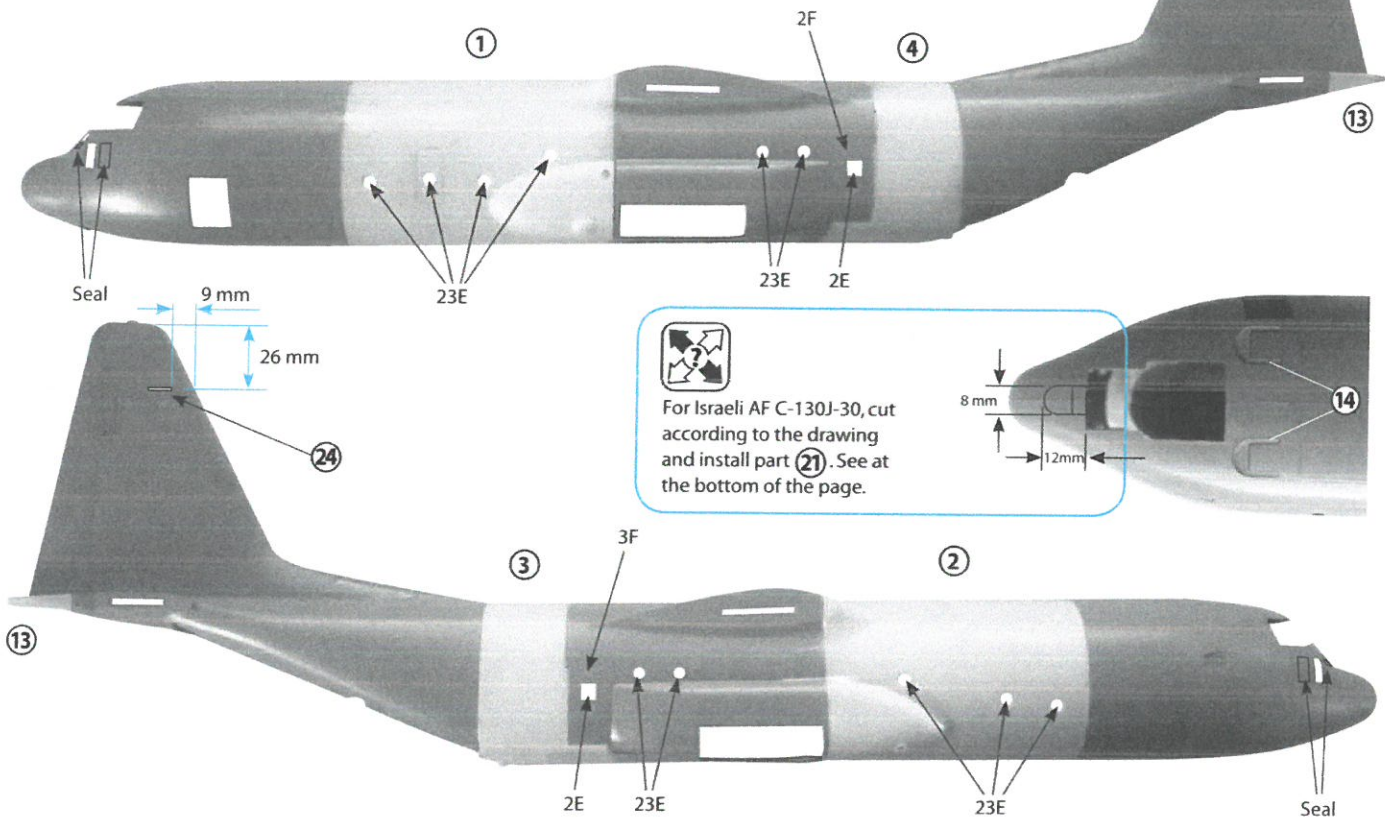

Basically the assembly of the kit is as shown in the kit instruction except issues that shown here and need to be done in the right building steps.

1. Assemble kit parts as seen in step one of the kit instructions.
2. Before step 2, cut the following parts exactly as shown here.

Install the fuselage plugs. Install the rear side entrance doors for better fit of the rear plugs.

Glue windows 23E in their new location as well as 2E windows. Locate windows 26E, 27E, 44E and 45E. Seal the relevant windows with filler.

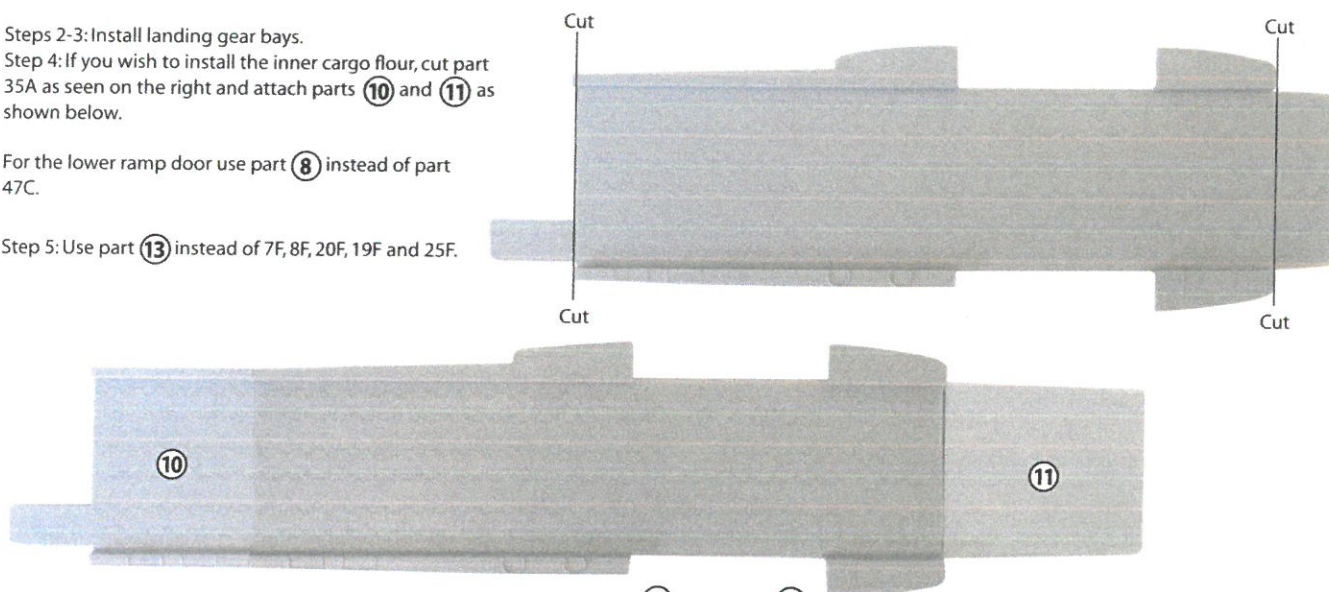

Steps 2-3: Install landing gear bays.

Step 4: If you wish to install the inner cargo floor, cut part 35A as seen on the right and attach parts ⑩ and ⑪ as shown below.

For the lower ramp door use part ⑧ instead of part 47C.

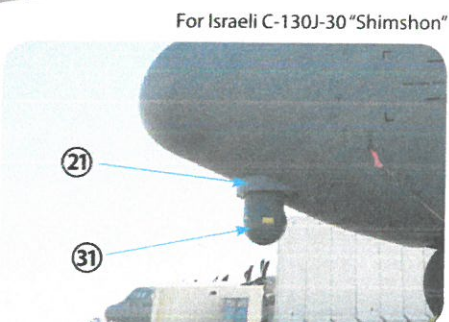

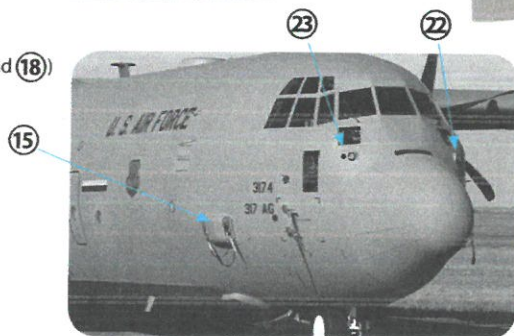

Step 5: Use part ⑬ instead of 7F, 8F, 20F, 19F and 25F.

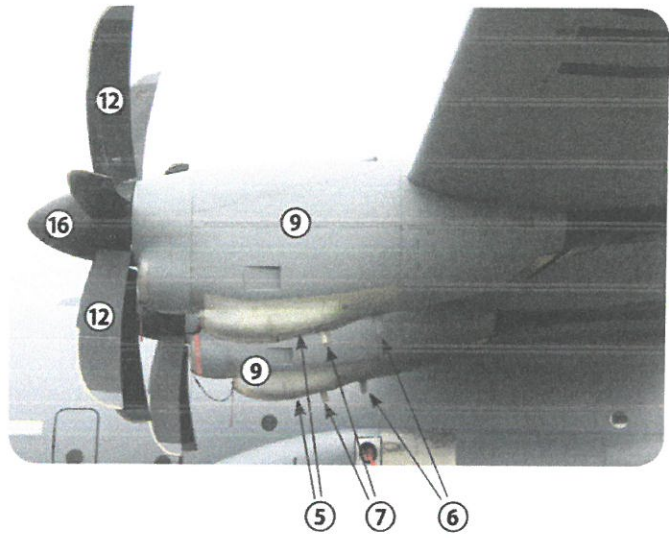

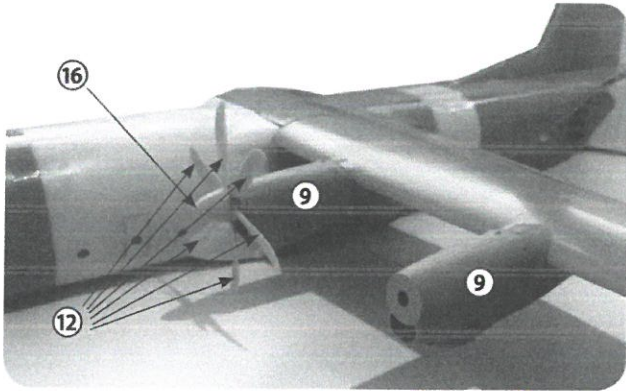

Step 6: Use the conversion wheels (⑰ and ⑱) instead the part provided by Italeri.

Install part ⑮ instead of part 14F.

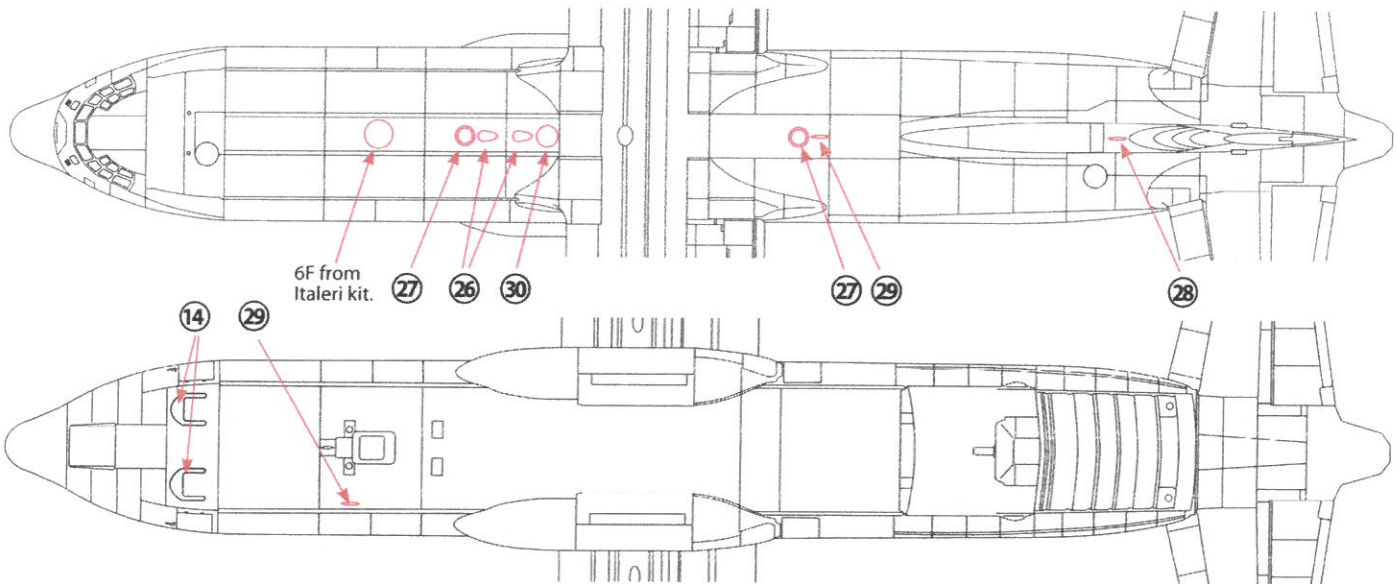

Install parts ⑳ and ㉓.

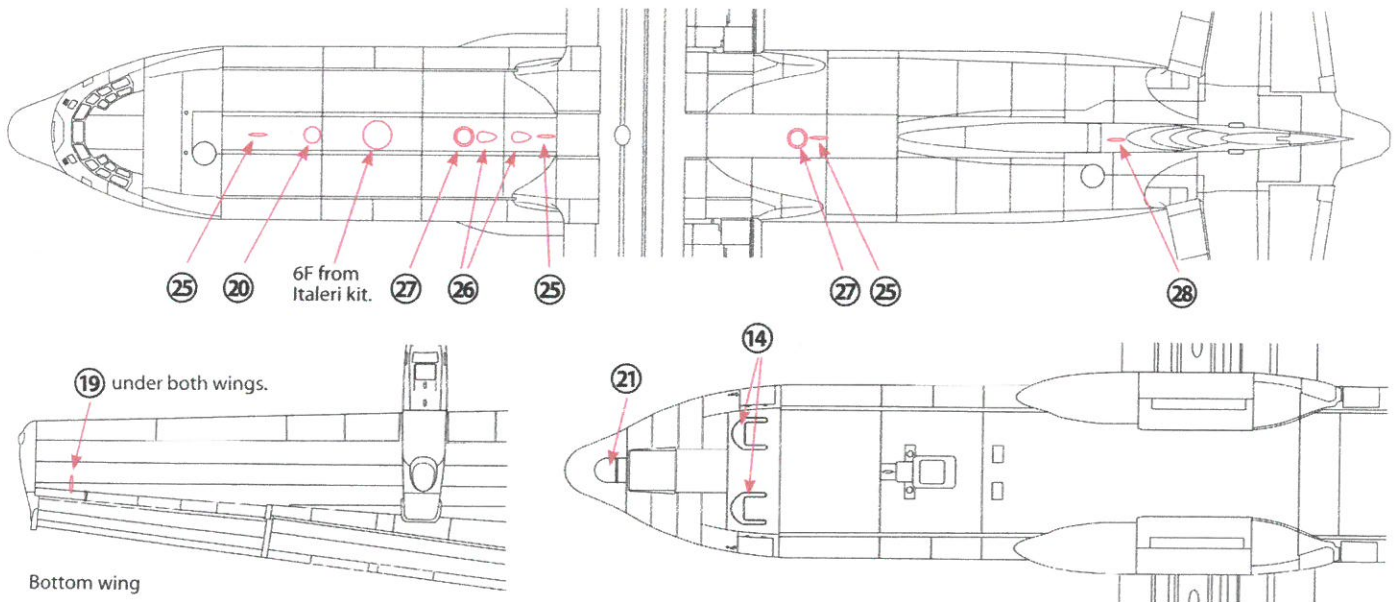

Step 7: Install the engines from the conversion set instead the parts from Italeri.
Assemble the rest of the parts as shown.
