He 111 Pencil Noses Part 2

• A close up photo labeled as being this a/c's tail is NOT the same a/c. A close inspection of the details (angle of ladder, etc.) show the close up is a different aircraft.

L40/52

He 111 B-1
1.K/88
Early 1937

PEDRO 4 art appeared on nose of aircraft

• No known photos show whether "Castelo Branco" repeated on right hand side, but we have included the artwork in case a photo is found. The same is true for the personal artwork.

He 111 B-1
1.K/88
Summer 1937

• Note that the '4' was different on each side of the aircraft. The '25' appears identical.

25•17

- A close up photo labeled as being this a/c's tail is NOT the same a/c. A close inspection of the details (angle of ladder, etc.) show the close up is a different aircraft.

25•4

- We do not know if the fuselage name or tail art were repeated on the right hand side. We believe it is likely at least the tail art was.
- The PEDRO numbers were only applied to the first 15 or 16 aircraft (CONDOR, page 178).

Applying the Decals

You probably already know all this stuff, so feel free to use your regular process; however, if you're new to aftermarket decals, here goes:

- Generally, use the Microscale Finishing System. We don't recommend extremely strong decal solvents such as Solvaset.
- Your model must have a smooth, glossy surface, as decals won't adhere well to matte surfaces. Use gloss paints or your favorite clear gloss overspray over matte or semigloss paint.
- Cut each subject out without trimming off the slight excess film (this helps the decal film disappear when dry).
- Put the decal in warm water that has a drop or two of liquid dishwashing soap or photo-flo for 10 seconds.
- When the decal will slide off the backing paper without forcing it, apply it to the proper position on your model. Slide the backing paper out from underneath.
- Gently blot off excess water and smooth out bubbles under the decal surface. If you wish, carefully brush on a mild decal softener such as Micro-Sol.
- When all decals are completely dry, gently wash off all excess decal adhesive.
- Finally, overcoat your model with a good quality gloss coat, followed by your choice of matte or eggshell clear topcoat.
