Maskovací šablona na kabinu a disky kol  
pro modely RS models 1:72  
Canopy and wheel disk masks for the 1:72 RS models kits

Made in Czech Republic

peewit@post.cz

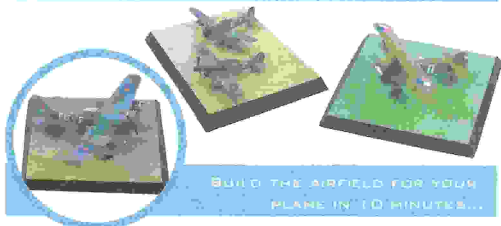

## Recommended tools

# Peewit

For easy application of canopy masks we recommend the following tools: a sharp modelling knife to peel the corner of a mask from the backing sheet ● tweezer with sharp point to hold and manipulate the mask ● wooden stick with sharp point for pressing the mask onto the plastic part and its smoothing (necessary to avoid paint getting under the mask) as well as removing the mask from the canopy after completing work to avoid scratching the clear part ● magnifier - the enlarged view will assist in placing the mask exactly where it is required on the canopy

**We offer you:**

PAPER DISPLAY BASES IN SCALE  
1:72 AND 1:144

BUILD THE AIRFIELD FOR YOUR  
PLANE IN 10 MINUTES...
