

M113A2 ARMORED PERSONNEL CARRIER

ACADEMY
MINICRAFT

1/35TH SCALE

In production over thirty years, longer than any other armored vehicle, the **M113** and its many sub-types serve in the armies of more than 50 countries! As this is written, over 40,000 M113's or variants have been built and delivered by FMC or its licensees!

Battle proven in Vietnam, the M113 enabled a ten-man squad of infantry to travel behind protective armor in an amphibious vehicle that carried sufficient weapons to be considered an offensive weapons system. Its ability to ford streams or even cross lakes made it an extremely useful vehicle in the waterlogged jungles of Southeast Asia.

Constructed mostly of welded aluminum alloy the **M113A2** is powered by a Detroit Diesel 212 hp engine capable of propelling the **M113** on land at 42 mph or in the water at 3.6 mph. The tracks are the only propulsion method employed when the **M113** is in water. Armed with a basic 50 caliber Browning machine gun plus whatever else might be brought on board as a field modification, the M113 can be a heavily armed offensive fighting weapon.

Though noisy and rough riding, no one assigned to an **M113** has ever requested transfer back to the foot infantry!
