"Yellow 4," a Bf109F-4 of 9/JG3 flown by ObFwbl. Eberhard von Boremski, May, 1942. With 74 confirmed victories, von Boremski ranked among the Luftwaffe's most successful enlisted-man pilots. His machine probably wears a field-applied scheme of RLM 79 Sandgelb, RLM 82 or 80 Dunkelgrün and RLM 75 Grauviolett over RLM 78 Lichtblau. Note the RLM 70 Schwarzgrün spinner, as well as the RLM 04 spinner tip, cowl chin, fuselage band and lower wing tips. However, combination could have been 70/02/79 over 78 or 79/80/74 over 78, our choice. Upper surface pattern unknown.

2

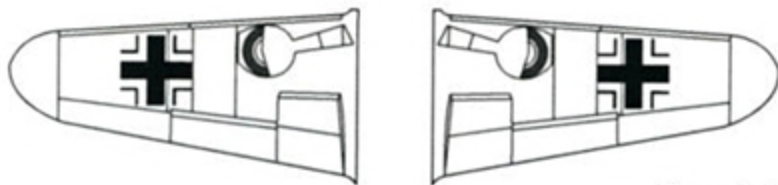

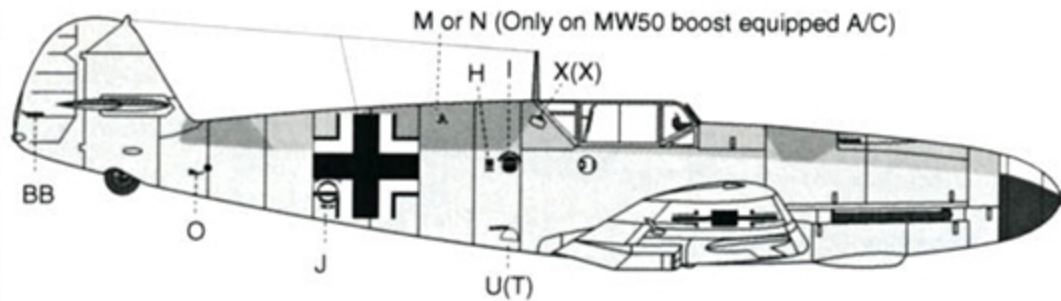

Bf109F-2 Flown by Maj. Hans Hahn, (one of the Luftwaffe's most colorful personalities). Score 108. Standard 74/75/76 camouflage with the cowling in Yellow and lighter Yellow (perhaps a freshly painted replacement) oil cooler lower cowling area. Yellow rudder. Black wing roots. Darker canopy framing, suggests RLM 66 color.

3

Me109 F-2 of Hptm. Hans Von Hahn (score 34) 1./JG3 Summer of 41, Russia. A/C wears a unique camouflage of 74/75/76, with rings over the fuselage and vertical tail surfaces. Black wing roots. Nobody knows for certain the color of these rings, but 71 or 74 are a good educated guess. The Yellow cowling was splotted on the top and sides in possibly 74/02. To create a good effect apply the Green Tatzelwurm first, and then mottle the cowling, leaving a Yellow surround and background to this badge. Use moderation. We have never seen a picture of the spinner, but the reference shows it with a Green and White spiral on the front 1/3 portion. We are providing you two spiral choices, one Green/White and one with only White, allowing the RLM 70 color to show through. Your choice.
