Sturmjäger IV./JG 3 "Udet"

As *Sturmstaffel* 1 evolved into IV./JG 3 (*Sturm*) and Major von Kornatzki formed II./JG 4 (*Sturm*), the *Sturm* mission expanded and was more clearly defined, the *Rammjäger* tactic was toned down by the new IV./JG 3 *Gruppenkommandeur* Wilhelm Moritz. It was a full-fledged bomber assault unit and ramming was discouraged. Mr. Moritz was interviewed in Canada several times by Jerry Crandall and much of the details were discussed regarding the *Sturmjäger* aircraft. These flashy, specialized *Sturmbock* (Male Sheep-Ram) machines with their Blue-Black cowlings were symbols of the proud unit. **EagleParts #45-32** Common Prop Blades or **EP#46-32** Prop blades with external weights, **EagleParts #57-32** *Sturmbock* conversion and **EagleParts #44-32** Tail wheel and yoke resins kits are recommended to accurize the 1/32nd Fw 190 Kit. To accurize the 1/48th kits, **EagleParts #6-48** Set of Fw wheels resin kit is recommended. Contact **Eagle Editions Ltd.** for possible availability of prop blades in 1/48th scale. **EagleParts #21-32** or **EP#21-48** Corrected Drop Tank resin kits are also recommended. **EagleParts #49-48**, corrected Fw 190 A gun cowl with machine gun barrels is recommended. Color note: Recovered cowl pieces from crashed IV./JG 3 aircraft have a Blue-Black cast very close to FS 26044. Black and White photos of these aircraft do appear to have a slightly different cast or lighter value than the Black of the *Balkenkreuz* or the IV. *Gruppe welle* (wave) over the White RV band. The cowling and spinners also appear to have a semi-gloss luster. As this color weathers and ages, it definitely turns to a Bluish-Black (FS 26044). In order to achieve an accurate color for these cowlings and spinner, it is recommended mixing 10% RLM 24 Dark Blue with 90% Black.

"Black 9" Fw 190 A-8/R7 **W. Nr. unknown** **11/JG 3** **July 1944** **Location Unknown**

Aircraft equipped with four 20 mm cannons; no machine guns, open troughs, no fairings. All three antennas intact. Blinkers, armored glass quarter panels on the windscreen and armored plate on the side of the fuselage (**EP#57-32** *Sturmbock* conversion recommended). Drop tank (**EP#21 in 48 or 32** is recommended). Propeller type unknown.

Colors: Undersurfaces RLM 76, upper surfaces RLM 75/RLM 74. Prop blades RLM 70 Black-Green. Spinner Black with White spiral. Blue-Black cowling and exhaust area trimmed in White.

National Markings: Fuselage; B3 800 mm RLM 74 Gray and White Crosses H2a Black with White outline *Hakenkreuz*
Wings: Upper - B6 910 mm White outline crosses, Lower - B2 900 mm Black/White with Black outline

Stenciling: Factory standard, JG 3 emblems on the armor plate under the cockpit on both sides

"Black 13" Fw 190 A-8/R7 **11/JG 3** **July 1944** **Location Unknown**

Pilot: Werner Gerth. *Werknummer* unknown. Aircraft equipped with four 20 mm cannons, no machine guns, open troughs, no fairings. Common propeller (**EP#45-32** Common Prop Blades is recommended to accurize kit). Blinkers on canopy, armored windscreen quarter panel (**EP#57-32** *Sturmbock* conversion recommended).

Colors: Under surfaces RLM 76, upper surfaces RLM 75/RLM 74. Prop blades RLM 70 Black-Green. Spinner Black with White spiral.

National Markings: Fuselage; B3 800 mm Black and White Crosses,
H2a Black with thicker than normal White outline *Hakenkreuz* (see decals)
Wings: Upper - B6 910 mm White outline crosses, Lower - B2 900 mm Black/White with Black outline

Stenciling: Factory standard, JG 3 emblem on motor cowling

References: Prien, Jochen: *IV./Jagdgeschwader 3*, Struve-Druck, Germany, 1996.

"White 7" Fw 190 A-8/R2 **10/JG 3** **July 1944** **Memmingen, Germany**

Pilot: Hans Weik *Staffelkapitän*. *Werknummer* unknown. 30 mm outboard cannons, no upper guns, fairings in gun troughs. Blinkers on canopy but no armored windscreen triangle (**EP#57-32** *Sturmbock* conversion recommended). No DF loop but base is there, FuG 25a antenna and 16zy antenna present. Common propeller (**EP#45-32** Common Prop Blades is recommended to accurize kit). Previously thought to be "White 1", incorrectly identified in reference listed below.

Colors: Undersurfaces RLM 76, upper surfaces RLM 75/RLM 74. Prop blades RLM 70 Black-Green. Spinner Black with White spiral. Blue-Black cowling and exhaust area trimmed with White. Black "K" under port wing tip.

National Markings: Fuselage; B3 800 mm RLM 74 Gray and White Crosses H2a Black with White outline *Hakenkreuz*
Wings: Upper - 910 mm White outline crosses, Lower - B2 900 mm Black/White with Black outline

Stenciling: Factory standard, JG 3 emblem on both sides of cowl. Victory bars on both sides of rudder.
