

## Henschel Typ 33 D 1

Im Zuge des ersten Motorisierungsprogramms forderte die Wehrmacht im Jahr 1926 u.a. die Entwicklung von geländegängigen Dreiachs-Lastkraftwagen mit einer Nutzlast von 3 Tonnen. An der Entwicklung beteiligten sich neben Henschel auch die Firmen Büssing und Krupp. Henschel lieferte die ersten Fahrzeuge, den „Typ 33 B 1“, im Jahr 1928 aus. Im Vergleich zu der zivilen Variante hatten die Fahrzeuge für die Reichswehr Dreispeichenfelgen und Zwillingbereifung an den Hinterachsen. Bereits im darauffolgenden Jahr wurde der „Typ 33 D 1“ mit einem stärkeren Dieselmotor (100 PS) eingeführt. Optisch erkennbar ist dieser Typ durch die längere Motorhaube und den verlängerten Radstand zwischen erster und zweiter Achse. Bei den frühen Ausführungen des „Typ 33 D 1“ wurden die Hinterachsen über separate Gelenkwellen angetrieben. Spätere Ausführungen hatten ab 1934 nur noch eine Gelenkwelle mit Durchtrieb zur zweiten Hinterachse. Auch wurden nur noch Simplexfelgen mit sechs Speichen verwendet. Bei Henschel liefen bis zum Ende der Fertigung im Jahr 1942 etwa 22.000 Exemplare aller Varianten des „Typ 33“ vom Band.

## Henschel Typ 33 D 1

In 1926, in the course of the first motorisation programme, the German Army required the development of cross-country six-wheeled trucks with a capacity weight of 3 tonnes. In addition to Henschel the firms Büssing and Krupp also participated in the development. Henschel supplied the first "Type 33 B 1" vehicles in 1928. Compared to the civil variants these vehicles for the German defence forces had three-spoke wheels with twin tyres on the rear axles. By the following year the "Type 33 D 1" with a more powerful diesel engine (100 hp) had been introduced. This type can be recognized from its longer bonnet and extended wheel base between first and second axles. In the early versions of the "Type 33 D 1" the rear axles were driven by separate drive shafts. Later versions from 1934 onwards had only one drive shaft with drive-through to the second rear axle. Simplex wheel rims with six spokes were also used. By the time production ended in 1942 about 22,000 of all variants of the Type 33 had rolled off the Henschel line.
