

## SMM3564K

### Ferret Early Features

Square Hatches and Sidelights (3 versions)

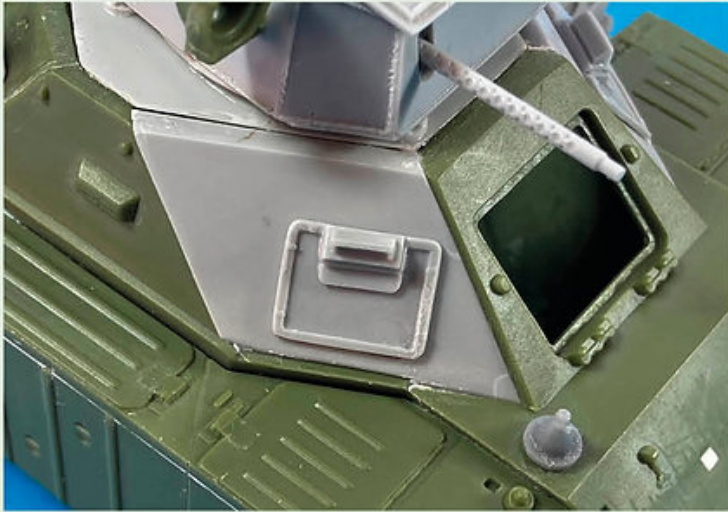

#### Driver's side hatches

Early production Ferrets had square driver's hatches on the sides. This applied to early Mk.1s (**SMM3564A**), Mk.2s (with small turret **SMM3564C**), and all subsequent conversions.

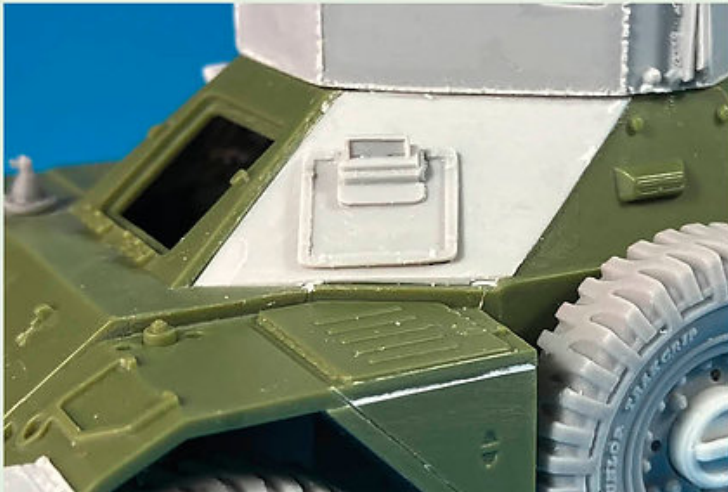

**62** Hull sides – square visors, L/R

**63** Square visors, left/right

Can be posed open or closed.

## Sidelights

Sidelights changed five times during the course of production. The sidelights given in the *Airfix* kit are **Type 3** (parts *D7/D8*) and **Type 5** (parts *D43/D44*) (the familiar towers with silight and indicator). A sixth was also introduced in Hong Kong, exclusively for their own Royal Hong Kong Defence Force Ferrets (*SMM3564C* and *D*).

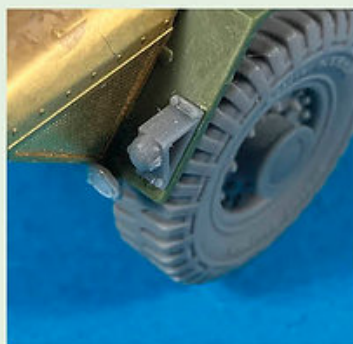

Type 1

Type 2

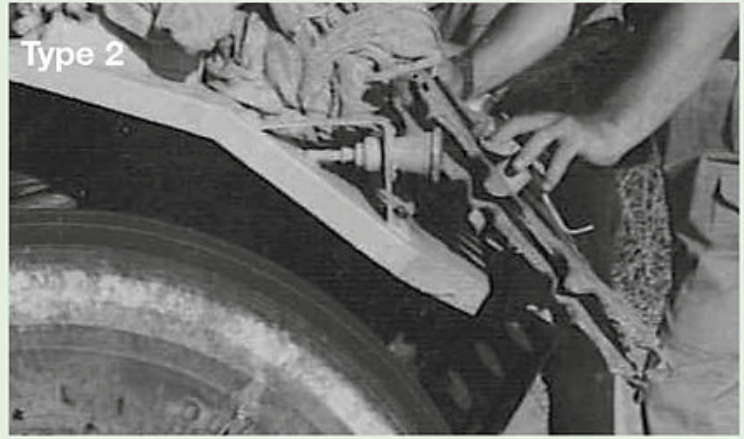

Type 4

Note that the angles are different front and rear.
