

Your product shall have the following **contents**:

- One **resin spruce**

#### **ATTENTION:**

There are different shaped beacons. Refer to the **spruce layout** below.

#### **Instructions:**

1. Use a resin saw to carefully separate a light from the spruce.
2. For the flat shaped ones: Paint the top side white (highlighted in grey) and only leave the sides clear.
3. Use PVA glue to place the beacon on your painted and polished model.
4. Remove excess glue and you're **done!**

#### **Spruce Layout:**
