

# 1/35 SG-65 Stalinetz Gas Equipment Set HATI Г-25 gas generator

No.35408

[WWW.LZmodels.com](http://WWW.LZmodels.com)

Made in EU

contains 1 highly detailed and accurate set

Reel assembly for weasels, jeeps, other vehicles and diorama

51 resin parts

30+ PE parts

wire needed for assembly

glue and paints not included  
suitable for average modellers

keep safety rules for work with resin

instructions and references on CD

**Keep safety rules when working with resin.**

**For safety reasons, and due to the complexity of construction, this kit is recommended only for advanced modellers.**

**The kit contains small parts, keep it out of the reach of children.**

**Glue and paints not included**

**Tractor Stalinetz SG-65**

**Manufacturer - Chelyabinsk Tractor Plant**

**Total of 7365 produced tractors SH-65, some references say there was over 17000 tractors equipped with HATI Г-25 gas generator that time.**

**MG-17 engine develops maximum power of 65 hp at 870 rpm.**

**Consumption of wood chocks was about 63 kg per 1 hour of work.**

**Do not use kit parts D10 and D13 for this conversion!!!! Drilling and adjusting the holes for various pipes will help a lot during your build - these are always marked and often half-drilled already. Most pipes are a bit longer than needed for assembly, adjust their length during your build as needed**

drilled holes 1mm  
for easier assembly  
later

**use spacer A29 to get correct gaps between tubes  
slice rods A22 to short pieces connecting pipes  
to assemble tubes one to another, completed piece  
should be as wide as length of PE10 is**

**PE mesh and frame soldered**

**PE bolt heads**

**11**

**PE 10 are glued to light bases on the radiator**

Tractor converted from the manufacturer did not have at all this pipe (engine set A19) to air filter, tractors converted later had this pipe usually just disconnected from the air filter

0.6mm wire

A8

holes 1mm drilled through A18, wires are pulled through and glued in holes drilled in A7

7

1mm wires

A33 glued on all lids from both sides, drilling 0,6mm holes for them helps a lot

cut the bench sides as shown

rear lights mounted on the channel

We are recently working on S65 tractor variant with blade conversion and conversion set for Trumpeter's kit - S-60 Stalinetz tractor conversion and US Caterpillar Sixty conversion  
More about it will be soon available at
