Kfir C2

Kfir C2

L.A.F.

Israel delivered the first squadron of Kfir to Ecuador in 1982, it were 10 single seat and a pair of two-seats. The most important participations of FAE 905 was in 1995 during the *Consejo Mar* between Ecuador and Peru (January 26 - February 26, 1995), where in February 10, 1995, FAE Capt. *Mauricio Mata*, shot down a Peruvian Cessna A-37B Dragonfly with a Shafrir 2 IR-homing air-air missile.

In 1999, Israel and Ecuador signed the delivery of two Kfir C10 and the upgrade of six C2 to C10 version, that were named Kfir CE.

It is possible the mixture of paint in this A/C is because it was in the middle of a repainting process that was abruptly interrupted, maybe for the Conquistador, but we have no evidence to support this.

\* FS 25299 faded so much in some zones, that turned in a grayish shade, similar to FS 36375, take this in consideration when you paint this model.
