## Safety first!

Resin dust is dangerous: **Wear a dust mask!**  
Wear eye protection when cutting resin with power tools.

# 1

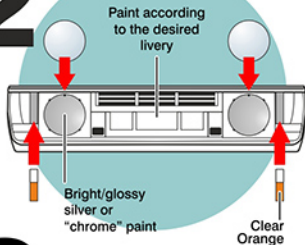

Carefully cut the bumper from the kit using the back of a x-acto blade.

Work your way slowly to get the best results.

**Tip:** Keep the lower part of the kit headlights to help the aligning of the resin bumper.

# 2

# 3

Create the opening for the back light

Study your references to identify the color of your version: clear red or clear

Preparation of the parts, including cutting, filing, sanding, glueing and painting is required. Join parts using cyanoacrylate or epoxy glue. Clear parts should be glued with PVA (white) glue.
