Aces II Ejection Seats

72406

1/72

True Details[®]
Squadron Products

ASSEMBLY GUIDE

1. The most important step in painting is to wash part with soapy water and old toothbrush.
2. Remove seat from resin base with a razor saw and sand bottom flat.
3. Paint seat with standard hobby paints.
4. To enhance seat, use a wash of black and dry brush with lighter shades of original colors.
5. Due to the complexity of seats, it is best to study reference material on the seat you are modeling to find out the exact colors needed.
6. Add any final detailing such as ejection handles.
7. Install completed seat into model.
