The U.S. Navy's version of the efficient F-16 Fighting Falcon is based on the Air Force F-16C, but has been modified specifically for the role of an adversary for the Navy's Top Gun training program. The first of these planes was delivered to the Navy on April 29, 1987, at NAS Miramar, near San Diego, Calif. The planes will be flown by the instructor pilots from Top Gun and from the adversary squadrons, VF-45 in Key West, Florida, and VF-126, based at Miramar.

The new F-16N's have performance characteristics much like the new generation of Soviet aircraft, such as the MiG-29 and Su-27, now in operation with the Russian air forces and their satellite countries. The aggressor planes are generally painted in Soviet-type camouflage and carry Russian-style numbers to complete the impression of doing combat with an actual enemy aircraft.

The excellent service record of the F-16 in world-wide usage was a major factor

in the selection of the Fighting Falcon. The F-16N has been modified to carry a different radar, more suited to its training role, and the 20mm cannon has been removed from the fairing on the wing extension. In most operations it will carry a simulated Sidewinder missile on one wingtip and an electronics pod on the other.

The markings on this model represent the first F-16N as it appeared during the presentation ceremony at Miramar.

## READ THIS BEFORE YOU BEGIN

- Study the assembly drawings.
- Each plastic part is identified by a number.
- Check the fit of each piece before cementing in place.
- Do not use too much cement to join parts.
- Use only cement for polystyrene plastic.
- Model may be painted to match photos on box.
- Allow paint to dry thoroughly before handling parts.
- Scrape paint from areas to be cemented.
- For better paint and decal adhesion, wash the plastic parts in a mild detergent solution. Rinse and let air dry.

## LISEZ CE QUI SUIT AVANT DE COMMENCER LE MONTAGE

- Etudier les schémas d'assemblage.
- Chaque pièce plastique porte un numéro d'identification.
- Contrôler que chaque pièce soit bien conforme avant de la coller à sa place.
- N'utilisez pas trop de colle pour réunir les pièces.
- Utilisez uniquement une colle spéciale pour polystyrène.
- Le modèle peut être peint conformément aux photos sur la boîte.

- Laissez sécher la peinture complètement, avant de manipuler les pièces.
- Grattez la peinture sur les surfaces devant être collées.
- Pour assurer la meilleure adhésion possible de la peinture et des décalcomanies, laver les pièces de plastique avec une légère solution savonneuse. Rincer et laisser sécher à l'air.

## LEA ESTO ANTES DE EMPEZAR

- Estudie los dibujos de ensamblaje.
- Cada pieza de plástico se identifica por un número.
- Verifique que cada pieza encaje bien antes de pegar en posición.
- No use demasiado pegamento para unir las piezas.
- Use únicamente pegamento para plástico de poliestireno.
- El modelo puede pintarse de acuerdo con las fotografías de la caja.
- Permita que se seque la pintura completamente antes de tocar las piezas.
- Raspe la pintura de las superficies que serán pegadas.
- Para una mejor fijación de la pintura y de las calcomanías, lávense las piezas plásticas en una solución de detergente suave. Enjuáguese y déjense secar al aire.
