| 13 GPS Antenna | 17 Tail Panel |

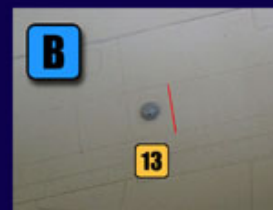

The F-15E Strike Eagle is a dual-role fighter designed to perform air-to-air and air-to-ground missions. An array of avionics and electronics systems gives the F-15E the capability to fight at low altitude, day or night, and in all weather.

During the operation 'Desert Storm' in 1991, the McDonnell-Douglas F-15E proved itself with its outstanding night capabilities, long endurance and heavy ordnance. Afterwards, the strike eagle went through many modifications including AIM-120 capabilities with the use of LAU-128/ADU-552 pylons, GPS equipment, JDAM capabilities, etc., which improved it further. The improved F-15E served well in operation Enduring freedom in 2001 and Iraqi Freedom in 2003.

(A) Fuselage Antenna

Some F-15Es have new blade type antenna on the top, and a few F-15Es were equipped with new Antenna in the under nose. (Our part number : 10)

(B) GPS Ball Type Antenna

After 2000, the F-15E were equipped with GPS equipment. Cut after the red line and place the resin parts.

(C) AAQ-13/14 LANTIRN Pod

The LANTIRN pod we supply is improved in detail compared to the kit supplied part. You may replace it with ours.

*Replace Revell kit parts number : 58/59/60/61

(D) Short front CFT pylons

Production F-15Es after block 58 (S/N: 96-0200) have shorter CFT pylons in the front. If you make an aircraft after F-15E block 58, you should replace the kit supplied parts with ours.

*Replace Revell kit parts number : 83/87

(E) ECM Antenna variations

F-15E is equipped with 2 types of ECM antennae. The photo shows the late production variant. The parts in the kit are for the earlier variant.

(F) LAU-128/ADU-552 Pylons

Nowaday, All F-15Es have LAU-128/ADU-552 Pylons. You may replace it with our resin pylons.

*Replace Revell kit parts number : 55
