YEARS OF

\* marked decal is added in 2008, so do not apply these if you are building the 2007's aircraft.

**Painting & Decal Guide**

In Nov. 2007, very unusually-painted F-16C was soaring into the sky of Texas. It is painted to celebrate 111th FS's 90th anniversary, which is established in 1917. In 2008, several markings are added to this aircraft and showed itself to public.

Note the RAM plate on the both sides of the nose.

UC WICKELSMITTSWEL

Paint the "lip" of intake FS36320

Note that there are NO air inlet / outlets on the vertical tail fin.

**For 1 Aircraft - Recommended Kit: Tamiya) for 1/32 F-16C**

DEC004

## Painting & Decal Guide

This aircraft is painted to celebrate 111th FS's 90th anniversary and telling its history by its colors and markings.

The yellow wing and rudder / flapover chevron, wing roundel represents pre-WWII era, "NS-A" does its WWII era with the roundel of that age, blue color for Korean War, and the gray color does the air superiority blue of the jet era.

Now 111th FS does not fly F-16s no more, because it is deactivated and transferred to be 111th Reconnaissance Squadron, operating the MQ-1 Predator since Jun, 2008.

As for the ornament entrance, this aircraft is shown as a clean condition or a couple of inert AIM-9 on the wingtip, all without any underwing / fuselage pylons attached.

This aircraft is F-16C block 25 84-1293, which is powered by PW engine and has small intake. We suggest Tamiya's kit, "1/32 F-16C Thunderbirds" is the best choice in the market and this product is designed to fit to H. We can not guarantee this product would fit to Hasegawa's old kit and Academy's block 40/50 kits. As for the decal for chevron supplied, you can cut it into two pieces if you feel necessary.

Finish your model with gloss topcoat.

### Applying decal

1. Cut all decal sheet from sheet.
2. Dip the decal into clear water for about 10 seconds. When water soaks better.
3. Place it onto a clean flannel paper to remove excessive moisture.
4. Slide the decal from the backing sheet to the clearest surface of the model. Adding a drop of water behind them helps to move decal into position.
5. Use cotton, tissue paper or clear cloth to press decal gently to remove air bubbles.
6. Apply topcoat ONLY on THUNDERBOLT OVER DECAL.

Align national insignias both sides

Paint wingstabilizer tips FS36329

Note the angle of the national insignias

Note the stiffeners plates

Our product CD32081 "F-16C Stiffener plate" is very helpful

Canopy is listed

★ marked decal is added in 2009, so do not apply these if you are building the 2007's aircraft.

### Color designation

FS33208	Cobalt Blue
For Wings	For fuselage
FS10449	FS36329
For fuselage ribs	For rudder

This aircraft is specially painted in blue, yellow and gray, but "the Cobalt Blue" is not specified in FS color. You should make your own cobalt blue to match the color of 111th FS roundel on vertical tail fin, referring the pictures attached. **WARNING: These colorships DO NOT feature the actual color!**
