INFORM & INSPIRE

HAWKER HUNTER

In RAF Service

Compiled by Neil Robinson
Illustrated by Jon Freeman

How to apply the decals:

Okay, you've probably built plenty of models and this is teaching you to suck eggs. But for those who haven't used aftermarket decals before here goes!

1: Apply to a glossy surface, so varnish your model first of all.

2: Carefully cut each decal out and dip in luke warm water for about 15 seconds. It may curl up then flatten out. Place it on a piece of kitchen roll to soak up excess water.

3: Apply to the model as close as you can to where the decal needs to be. If you have to move it keep the area wet and use a brush to position the decal.

4: Soak up any excess water with a cotton bud (Q tip to our friends in the US)

5: Leave to dry for 24 hours before sealing with varnish

6: Sit back when you've finished your model and admire the results.

Roundels: 12 total, including a dark blue roundel with a red center.

 Tail Codes: WT572, WT694, XE, XF, Y.

 Squadron Identifiers: RRR, 33, 88, 26.

 Text: FIGHTER COMBAT SCHOOL (repeated), WT572, WT694, XE, XF, Y, 26.
