GENERAL ASSEMBLY: This highly-detailed kit features precision-tooled parts for ease of assembly. Care and patience must be exercised to achieve optimal results.

GLUE ASSEMBLY: It is recommended that the instructions be examined carefully before applying cement. You will find this very helpful, as it will allow you to gain a clear understanding of how the parts fit together in order to best plan painting and final assembly.

SUB-ASSEMBLIES: Note that this kit is intended to be built in

sub-assemblies. This makes building the kit far more manageable. It is very important to note that it can be extremely advantageous to apply paint and decals to sub-assemblies before completing final assembly.

DECALS & PAINT: This kit includes water slide decals. These decals are compatible with setting solution which can be applied to conform around surface details. See the diagrams on the box bottom for instructions regarding decal and paint placement. For best results apply clear coat for final finish.
