The EF-111 Raven is a tactical jamming aircraft designed to overcome the extremely high air defense threats encountered in modern warfare. Closely resembling its predecessor, the F-111A fighter, the Raven combines the agility of a fighter, the payload of a bomber, and the electronic countermeasures (ECM) equipment of a jammer.

The EF-111 was developed for the electronic warfare role by Grumman Aerospace Corporation. It is equipped with an ALQ-99E jamming system which has the ability to pick up, identify, and neutralize hostile radars over a wide range of frequencies. Distinguished by its fin cap radome and canoe-shaped

weapons bay radome, it carries various antennae added to accommodate new avionics.

The Raven is operated by a crew of two, a pilot and an electronic warfare officer. The EWO operates the complex electronic systems of the aircraft. Power is provided by two Pratt & Whitney TF30-P-3 turbofan engines. Maximum speed is over 1400 miles per hour, and the aircraft's combat ceiling is in excess of 44,000 feet.

Your Monogram model of the EF-111 can be completed in the latest low-visibility gray camouflage scheme. It is a highly-detailed kit of an aircraft that will play an indispensable part in aerial warfare.
