

# 1:72 Starter Set BAe Harrier GR9A

## A55300 SCALE MODEL CONSTRUCTION KIT

**EN**

The GR9 entered service in October 2006 as an updated and improved version of the already very successful Harrier GR7. Boasting an improved avionic suite, as well as a much improved weapons capability, the GR9 represents a substantial leap forward in capability over the older GR7 Harriers. Able to carry the new Sniper targeting pods, the GR9s have proved themselves to be excellent ground attack warplanes, engaging hostile targets with great effectiveness in the skies over Afghanistan. Alongside the Sniper targeting pod, the GR9 can carry a range of offensive weapons, from the unguided CRV-7 rockets, to the very accurate laser-guided Paveway series of bombs, as well as sidewinder missiles for close quarters air defence. During their deployment to Afghanistan, the Harriers proved to be a valuable asset, able to hit targets both accurately and quickly, saving the lives of many ISAF personnel. With all of these improvements the Harrier loses none of what made it a famous and great warplane to begin with, its manoeuvrability and ability to operate from rough fields vertically still remains, enabling the Harrier

En octobre 2006, le GR9 entra en service en tant que version actualisée et améliorée du Harrier GR7 déjà très réussi. Équipé d'une électronique aéronautique améliorée ainsi que d'une capacité d'armement perfectionnée, le GR9 représente un grand bond en avant par rapport à l'ancien Harrier GR7. Capables d'embarquer les nouvelles nacelles de désignation laser Sniper, les GR9 se sont avérés être d'excellents avions d'attaque au sol, engageant très efficacement des cibles ennemis dans l'Afghanistan. Outre la nacelle de désignation Sniper, le GR9 peut porter une gamme d'armes offensives, depuis les roquettes CRV-7 non guidées jusqu'à la série de bombes Paveway guidées par laser et très précises en passant par les missiles Sidewinder utilisés pour la défense aérienne à distance rapprochée. Pendant leur déploiement en Afghanistan, les Harrier se sont avérés être des atouts précieux, capables de frapper des cibles d'une façon précise et rapide, sauvant ainsi de nombreuses vies du personnel de la FIAS. Toutes ces améliorations assurent que le Harrier ne perd rien de ce qui l'a rendu célèbre dès son origine en tant qu'avion de combat formidable. Sa maniabilité et sa capacité d'opérer verticalement à partir de terrain

to be one of the most versatile and tactical warplanes of all time. In October 2010, it was announced that the Harrier fleet was to be retired in 2011, thus making the GR9 the final variant of the long serving Harrier to see service.
