Paramount among the legends of the western American Indians is the Thunderbird. This powerful creature was said to cause thunder and lightning when it flew, and this is the image the United States Air Force sought to capture when it created its renowned flight demonstration team, the Thunderbirds. The purpose of the team was to convey to the public the quality and capabilities of its pilots and the high-speed jet aircraft they flew.

Since the first precision demonstration on June 1, 1953, at Nellis Air Force Base, Nevada, the Thunderbirds' performances have thrilled audiences all over the free world. In its long history, the team has flown most of the Air Force's contemporary jet fighter and trainer aircraft.

In 1956, the Thunderbirds went supersonic with the acquisition of their first North American F-100 Super Sabres. This pairing of men and machines was to last until 1969, the longest service record of any aircraft operated by the team. Though inevitably replaced, the Super Sabre remains one of the most popular aircraft associated with the Thunderbirds.

In 1977, a surviving example of the team's F-100Ds was found in service with the South Dakota Air National Guard. Returned to Nellis AFB for repainting, she now graces the collection of the Air Force Museum at Wright-Patterson AFB in Ohio. Resplendent in her Thunderbird colors, she proudly represents the team and the many aircraft flown by them over the decades.

Your Monogram model is provided with colorful decals that faithfully duplicate the attractive paint scheme of an F-100D flown by the Thunderbirds from 1964 to 1969.

READ THIS BEFORE YOU BEGIN
- Study the assembly drawings.
- Each plastic part is identified by a number.
- Check the fit of each piece before cementing in place.
- Do not use too much cement to join parts.
- Use only cement for polystyrene plastic.
- Model may be painted to match photos on box.
- Allow paint to dry thoroughly before handling parts.
- Scrape paint from areas to be cemented.
- For better paint and decal adhesion, wash the plastic parts in a mild detergent solution. Rinse and let air dry.

ALLGEMEINE HINWEISE
- Die Anordnung der Bauteile ist aus den Zeichnungen der Anleitung ersichtlich.
- Jedes Plastikteil ist durch eine Nummer gekennzeichnet.
- Die Teile vor dem Verkleben ungeleimt zusammenhalten, um ihren Passitz zu prufen.
