Aero 45 Cockpit Detail Set
(for 1/72 KP kits)

This set is meant to replace KP kit parts 8, 9, 10, 11, 12, 21, 22 and 23.

Ejection marks inside the front fuselage halves should be removed before securing the 'tub'; the cockpit insert can be glued in before the fuselage halves are joined together, or preferably, for a better adjustment, after (as long as the wings are not attached of course!). Front seats and handlebars can be added at a later stage to ease masking and painting of the aircraft.
