

**FRETTLE, EXPANDED COLOR MARKINGS**  
 The kit can be painted in a wide range of colors. The color scheme is based on the markings of the aircraft as they appeared in 1950. This includes the following:  
 FS 33889  
 FS 34440

Every effort has been made to ensure the model is as accurate as possible. However, some parts may be missing, please write to:

At the time of the United States entry into World War II, the Wildcat was the U.S. Navy's standard fighter. It was designed and built by General Motors. The aircraft's armament consisted of four or six .50 caliber machine guns. The Wildcat proved to be a very durable aircraft due to its rugged construction which kept it flying over its many enemy kills.
