

- FS# 15052 Blue
- FS# 13538 Yellow

Tail pipe & drag chute housing are polished natural metal. Note slightly stretched exhaust pipe.

Other Painting Notes: Intake insides, landing gear and landing gearwells are all gloss white. All attached gear doors are FS# 15052. Cockpit colors are the same as a standard A-4F.

Decal Note: For displaying your model with the canopy open, attach the canopy in the closed position with diluted white glue, apply the decals and let dry completely. Then, carefully cut along canopy edge. Also, apply the pilot's name first, so that you have enough room for the striping underneath.

**NOTE:** All Blue Angels A-4Fs were modified to the "Super Fox" standard and had the enlarged engine air intakes and extended jet nozzle (but not the fin tip radome) included in that conversion. These parts are available in Cutting Edge Conversion set CEC48316, available from Meteor Productions, Inc.
